## Rationale and Transfer Goals

---

In collaborative teams, students will create a persuasive writing document in script format. Students will then video record a commercial that advertises their prior project as an item for (not actual) sale in which they will speak about their product in detail, while demonstrating it.

## **Enduring Understandings**

---

Writing is a continuous process of review and revision.

The time needed for writing and its related revision process can be shorter or more lengthy depending upon what is being created.

When writing, the writer needs to keep task, purpose and audience in mind.

Persuasive writing is used to advertise products.

Working in collaborative teams is essential to gathering a wealth of ideas and diverse points of view for the creation and revision process.

There are situations where “formal” language is used and situations where “informal” language can be used, and it is essential to determine when it is correct and appropriate to employ either.

Technology can be employed to enhance writing with text, color, imagery and video.

Participating effectively in a range of conversations and collaborations with diverse partners can help to build on ideas and express ideas clearly and persuasively.

Information can be presented in diverse media formats, including visually, quantitatively, and orally.

Writing and speech apply to a variety of contexts and communicative tasks.

Words can have non-literal meaning, shades of meaning and relationships to other words.

Effective language use and vocabulary are important to reading, writing, speaking and listening.
