

Oct. Gr. 2 Letter Writing

Content Area: **English**
Course(s):
Time Period: **October**
Length: **6-8 Weeks**
Status: **Published**

Unit Overview

Text Type: Opinion/Argument

Letters have been written for about as long as humans have been able to communicate through writing. Besides actual face-to-face conversation, for a long time letters were the only way to establish and maintain relationships with those who were not immediately available. Reading letters helps us learn about how lives were lived and what people believed and knew in the past. Today writers—any writers—are able to share their thoughts through emails, text messages, and posts on the Internet that reach a wider audience than a letter to a friend or even a small group of friends. And writers are able to reply instantly, keeping up a correspondence over days and changing topics. Letters can have a multitude of purposes. They can be informal when written between friends or formal when written for business purposes. They can be requests for information, offer complaints or praise, or share opinions (e.g., when sent to editors of newspapers or magazines). More formal letters can be meant to persuade a reader to action or to request the cessation of action. The need for humans to communicate has not gone away even as technology has changed modern life. As a genre, it's likely the letter itself—in all its many forms—will be with us for a long time.

Enduring Understandings

Writers have long used letter writing to communicate with others in a meaningful way.

Letter writers follow the conventional rules governing formal and informal letter formats.

Essential Questions

How can you use letter writing to communicate to another person?

How do you write an effective letter?

What conventions and formats do letter writers use?

Career Awareness and Planning

CRP.K-12.CRP6.1

Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.

Technology and Design Integration

Students will interact with Smartboards, Ipads, Chromebooks and document camera.

CS.K-2.8.1.2.CS.1

Individuals use computing devices to perform a variety of tasks accurately and quickly. Computing devices interpret and follow the instructions they are given literally.

Interdisciplinary Connections

Through the mentor texts, and personal choice text, students will make interdisciplinary connections during the writing process.

SOC.6.1.4.D.CS6

American culture, based on specific traditions and values, has been influenced by the behaviors of different cultural groups living in the United States.

SOC.6.1.4.D.CS5

Differentiation

Based on individual need, teachers will offer additional support through conferencing, modified mentor text, peer support and individualized mini-lessons.

Advanced learners will be offered more rigorous mentor texts to emulate, teacher conferences and reference materials to support in-depth writing endeavors, based on choice.

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Based on individual need, teachers will offer additional support through conferencing, modified mentor text, peer support and individualized mini-lessons.

Advanced learners will be offered more rigorous mentor texts to emulate, teacher conferences and reference materials to support in-depth writing endeavors, based on choice.

Modifications & Accommodations

IEP accommodations, and modifications will be in place, and teacher assigned modifications and accommodations will be assigned, assessed, and monitored.

Follow IEP accommodations and differentiate materials, project requirements as needed.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

DRA and Aimsweb

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher conferences

worksheets

Anecdotal records

Student drafts

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self-Reflection

uses a self-reflection questionnaire.

Rationale: Students need to reflect on their hard work as letter writers to understand their growth through this unit

and to continue developing their sense of themselves as writers.
