

# Sept. Gr.2 : WRITING: How Writers Work

Content Area: **English**  
Course(s):  
Time Period: **September**  
Length: **6-8 Weeks**  
Status: **Published**

## Unit Overview

---

Text Type: Launching

This unit was created to help students understand the writing process and get to know how and why writers write in the ways they do. Students will find out all of the different reasons why we write and have the opportunity to build their own writing identities. The books in the study will help students read closely, think about the authors' purposes, and understand them as people as well as writers. The texts span multiple genres, styles, structures, and themes. The topics will allow students to connect to the authors' experiences and share their own. For a writing workshop to run smoothly, students need to know what they are expected to do. Procedural conversations—such as how the writing workshop will function, what the writing tools are and how they will be used, and what students should do if they think they're done writing—are also presented in this unit.

## Enduring Understandings

---

Students will discover that writers get ideas for writing by using their senses to observe the world around them, and how they use their notebooks to record their ideas.

Writers create drafts using their notes to create stories that have beginnings, middles and ends.

## Essential Questions

---

How do writers generate ideas and take notes they use to create their stories?

How does a writer organize their thinking to create a story with a beginning, middle and end?

## Instructional Strategies & Learning Activities

Personal, family, and community history is a source of information for individuals about the people and places around them.

## **Differentiation**

---

Based on individual need, teachers will offer additional support through conferencing, modified mentor text, peer support and individualized mini-lessons.

Advanced learners will be offered more rigorous mentor texts to emulate, teacher conferences and reference materials to support in-depth writing endeavors, based on choice.

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.
- Process – how the student will acquire the content information.

- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

## **Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

### **Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

**Additional Benchmarks used in this unit:**

DRA and Aimsweb

## **Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

**Formative Assessments used in this unit:**

Discussion

Teacher conferences

worksheets

Anecdotal records

Student drafts

## **Summative Assessments**

---

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

## **Summative assessments for this unit:**

### Student Self-Reflection

uses students' published pieces, Writers' Notebooks, and a self-reflection handout for students to complete.  
Rationale: Reflection is an important part of the writing process, as a writer's work is never truly finished.

### Having

students reflect on their learning and set goals for the future enables them to become more independent writers.
