Instructional Strategies & Learning Activities

Interactive Read-Aloud Lessons

Lesson 1: Getting to Know Nonfiction
uses all unit texts.

Rationale: Readers of nonfiction understand why and how we read nonfiction: for enjoyment and to learn new information. Students will learn how to recognize the three major types of nonfiction texts—reference, biography, and literary nonfiction—and how to use this information and their own background knowledge about a topic to build meaning.

Common Core State Standards: RI.2.1, RI.2.10, SL.2.1, SL.2.6, L.2.1, L.2.3, L.2.6

Skills and Strategies: Text and Genre Features/Structure, Using Schema, Speaking to Communicate, Listening and Responding, Engaging in Discussion/

Collaborating

Lesson 2: Look at Those Features!

uses *Tell Me, Tree: All About Trees for Kids* by Gail Gibbons.

Differentiation

Based on individual need, teachers will offer additional support through conferencing, modified mentor text, peer support and individualized mini-lessons.

Advanced learners will be offered more rigorous mentor texts to emulate, teacher conferences and reference materials to support in-depth writing endeavors, based on choice.

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.

- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Student Strengths and weaknesses will be assessed and monitored, and individualized/differentiated learning will be assigned as appropriate. Level appropriate text will be provided as deemed appropriate.

Additional leveled text will be made available and offered to students requiring additional challenge. Assignments may vary from the traditional.

Modifications & Accommodations

IEP accommodations, and modifications will be in place, and teacher assigned modifications and accommodations will be assigned, assessed, and monitored.

Follow IEP accommodations and differentiate materials, project requirements as needed.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Student Strengths and weaknesses will be assessed and monitored, and individualized/differentiated learning will be assigned as appropriate.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

DRA and Aimsweb

Linkit testing 3 times a year.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Anecdotal records

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of

ways to combine these approaches.
