Unit Overview

The poet Julia Cunningham says, "Poetry is, to me, a place to be. Walk with your words into these secret, mysterious, and magic places where poems lead you." Poetry is a rich and engaging genre that invites readers to study and appreciate the beauty and functions of language. It awakens their sense of the many extraordinary things they can notice in their everyday world. The genre of poetry allows readers to create new and surprising images while also uncovering meaning and exploring emotions. Through the use of rhyme, imagery, and figurative language, readers are exposed to literary devices that remain in our thoughts and create opportunities for reflection and celebration. Poetry offers something for readers of all ages and interests, and it exercises all of our imaginations. What greater joy can young readers experience than discovering something new about themselves, or their world, through reading? Poetry does this. It is the natural bridge between cognitive learning and personal expression.

Enduring Understandings

Students will: n Interpret a variety of poems and their structural elements; n Use their senses and create mental images to understand poems; n Make connections with various poems and use background knowledge or schema to determine meaning; n Ask and answer questions to clarify thinking and deepen understanding; n Use strategies before, during, and after reading to aid comprehension; n Apply self-monitoring skills and strategies to determine the meaning of important vocabulary; n Read and compare poems, focusing on how and why poets orchestrate the reading of their poems through layout and structure; n Determine rhyme scheme to help them figure out unknown words; n Determine how words and phrases create rhythm and meaning; n Recognize that repeated readings and reading a poem aloud can heighten the readers' understanding of a poem; n Apply self-monitoring skills and employ fix-up strategies when meaning breaks down; n Analyze poems for a variety of literary elements, including elements of structure (stanzas, verse), figurative language, and other crafting techniques, such as line breaks and white space; n Deepen their understanding of author's purpose; n Interpret words and phrases in order to notice and/or discuss how these words and phrases shape meaning and enhance mood and tone; n Recognize qualities that enhance poetry, such as shared observations of the world, messages or big ideas that are revealed, and opportunities to infer purpose and inspiration; n Examine how reading several poems connected by theme can help with understanding individual poems within a collection; React to a poem using drawings, movements, and/or performances; and n Uncover themes and big ideas within and across poems through making inferences and synthesizing thoughts and ideas.

The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

Differentiation

Based on individual need, teachers will offer additional support through conferencing, modified mentor text, peer support and individualized mini-lessons.

Advanced learners will be offered more rigorous mentor texts to emulate, teacher conferences and reference materials to support in-depth writing endeavors, based on choice.

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be offered leveled reading books to suit their skill needs and interests.

Modifications & Accommodations

IEP accommodations, and modifications will be in place, and teacher assigned modifications and accommodations will be assigned, assessed, and monitored.

Follow IEP accommodations and differentiate materials, project requirements as needed.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

All IEP and 504 accommodations will be utilized.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

Linkit testing 3 times a year.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

teacher observations

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Mentor Texts: sharing the seasons by Lee Bennett Hopkins (Ed.) This wonderful anthology of forty-eight poems—twelve for each of the four seasons—includes contributions by notable poets such as Henry Wadsworth Longfellow, Carl Sandburg, J. Patrick Lewis, Marilyn Singer, and a host of others. The poets' interpretations of the seasons and the words they use to present their interpretations are sure to evoke vivid images in the minds of young readers, adding to their understanding of each poet's message. Hearing and reading any or all of these forty-eight poems allows readers to make connections with the poets' words by thinking about how they relate to the personal experiences they've had during each of the four seasons. Illustrator David Diaz's colorful and fanciful illustrations that accompany each of the poems enhance readers' understanding of not only the poets' message but also the words they used to express it.
