Course(s):
Time Period: **September**
Length: **8 - 10**

Unit Overview

Text Type: Informational/Explanatory

A nonfiction book can be a reference book, or it can share information through a story. This unit serves as an introduction to the purpose, style, and structure of the literary or narrative nonfiction genre. The books chosen for this unit offer excellent examples of how a variety of fact-based texts can be conceptualized, organized, developed, revised, and published. In this unit students will discover the features of nonfiction writing, including that nonfiction is fact based, has an informative purpose, uses data and specific details, involves and compiles research, uses graphics and other visual aids, and employs content-specific vocabulary. Students will also explore their own interests, passions, and areas of expertise to generate ideas for writing; use creative devices to entertain as well as inform readers; and collect information on their topics from multiple sources including books, magazines, and web sites.

Enduring Understandings

Nonfiction texts include formatting and features that organize information logically, emphasize key ideas, and list sources used to research the topic.

Nonfiction writing contains primary source information.

Essential Questions

How do non-fiction writers research and organize their information to emphasize key ideas?

How do non-fiction writers list their sources?

Technology and Design Integration

Students will interact with the SmartBoards, Chromebooks, and Document Camera.

Computing devices may be connected to other devices to form a system as a way to extend their capabilities.

Societal needs and wants determine which new tools are developed to address real-world problems.

The technology developed for the human designed world can have unintended consequences for the environment. Technology must be continually developed and made more efficient to reduce the need for non-renewable resources.

Interdisciplinary Connections

Mentor texts and personal choices for research provide interdisciplinary connects to math, science, social studies, technology and the arts.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Differentiated through topic selection, paragraph construction, additional challenges as needed, support as needed.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Modifications and accommodations in accordance with individual IEP's.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Completed year nonfiction writing piece

Completed end of year nondiction writing piece

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Pre-writing activities embedded in the lessons.

Rough draft construction.

successful writing process progression

teacher conferencing

anecdotal notes

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self-Reflection

uses a self-reflection questionnaire.

Rationale: All writers engage in self-reflection to learn and grow as writers. Students will reflect on and self-assess

their learning by completing a self-assessment questionnaire.
