Unit Overview

Text Type: Opinion/Argument

Biographers write about people who interest and inspire them. People they admire and respect from the past or present are worthy subjects for students' biographical writing. In this unit students will form opinions about the various people studied based on the accomplishments and attributes discussed. Students will explore the features of biographies and examine the differences and similarities between these features and how they influence readers. Students will also see how different biographers present the important events, accomplishments, struggles, and character traits of a person's life, as well as how they use word choices and tone to convey their admiration for and opinions of the people they write about. The biographies selected for this unit give students a chance to explore inspirational people who lived during various time periods, came from different cultural backgrounds, and had various influences on a variety of topics and/or issues such as sports, politics, human rights, the environment, literature, and more. The books in this unit of study can be used seamlessly within your social studies, science, art, and reading curricula, as well.

Interdisciplinary Connections

Mentor texts and personal choice texts make interdisciplinary connections in math, science, social studies, technology and the arts.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be able to choose personal mentor texts based on reading levels

Teacher will re-teach in small group instruction, as needed

Students will have choice on writing topics, with supporting materials as needed.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

IEP accommodations will be implemented.

Additional support will be available, including small group instruction outside the classroom

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Beginning of the Year Writing Assessment

End of the Year Writing Assessment

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher conferences

Worksheets in the Schoolwide unit

Anecdotal notes

teacher made materials for assessment

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self-Reflection

uses a self-reflection questionnaire.

Rationale: At the end of a writing project, students will spend time reflecting on their work, the process, and the product
