Unit Overview

Launching Grade 4

DESCRIPTION

The beginning of the school year is an exciting time! Students enter their classrooms with a heightened sense of curiosity and wonder. First impressions go a long way for young learners, and it is important for them to experience a comfortable and engaging invitation into their literacy-rich environment. Brightly decorated bulletin boards, shiny desks and tables, and beautifully organized books await your students. The start of each new school year provides opportunities for you and your students to create a community of learners who respect, listen to, share, and respond to the thoughts and ideas of others. This is especially important when considering your community of readers.

Enduring Understandings

Students will: n Develop an understanding of themselves as readers; n Learn to self-select appropriate texts; n Set goals for themselves as readers; n Learn the expectations and routines for actively participating in a reading community; n Learn how to engage effectively in a range of collaborative discussions; n Learn how to follow agreed-upon rules for discussions; n Learn to present their ideas about a topic or text using relevant facts and details to support their points; n Learn how to ask and answer questions to clarify understanding of a topic under discussion; n Recognize the differences among books that entertain, inform, and persuade, drawing on a wide reading of a range of text types, including fiction, poetry, and nonfiction; n Develop habits of mind for engaging with a variety of complex texts; n Learn how to apply self-monitoring skills; n Learn how to determine the meaning of challenging vocabulary words and phrases in a text; n Learn how to ask and answer questions to demonstrate understanding of a text; and n Learn how to refer to details and examples in a text to determine a theme and/or draw inferences from a text.

The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

TECH.9.4.5.DC.4	Model safe, legal, and ethical behavior when using online or offline technology (e.g., 8.1.5.NI.2).
TECH.9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global (e.g., 6.1.5.CivicsCM.3).
TECH.9.4.5.GCA.1	Analyze how culture shapes individual and community perspectives and points of view (e.g., 1.1.5.C2a, RL.5.9, 6.1.5.HistoryCC.8).
TECH.9.4.5.TL.3	Format a document using a word processing application to enhance text, change page formatting, and include appropriate images graphics, or symbols. Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills. The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.
WRK.9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
TECH.9.4.5.CI.3	Participate in a brainstorming session with individuals with diverse perspectives to expand one’s thinking about a topic of curiosity (e.g., 8.2.5.ED.2, 1.5.5.CR1a).
WRK.9.2.5.CAP.2	Identify how you might like to earn an income.
WRK.9.2.5.CAP.3	Identify qualifications needed to pursue traditional and non-traditional careers and occupations. Culture and geography can shape an individual’s experiences and perspectives.

WRK.9.2.5.CAP.4

Explain the reasons why some jobs and careers require specific training, skills, and certification (e.g., life guards, child care, medicine, education) and examples of these requirements.

Technology and Design Integration

In combination with the Writers workshop, students will produce a variety of work using technology to show understanding. students will interact with the lessons through the Smartboard.

CS.3-5.8.1.5.IC.1

Identify computing technologies that have impacted how individuals live and work and describe the factors that influenced the changes.

Interdisciplinary Connections

Students will learn about different disciplines through a variety of personal and group texts.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be offered leveled texts based on skill and interest.

Modifications & Accommodations

Modifications and Accommodations used in this unit:

IEP and 504 accommodations will be utilized.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Teacher observation

worksheets

conferencing

teacher made texts

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
