Unit Overview

DESCRIPTION

The poet Julia Cunningham says, "Poetry is, to me, a place to be. Walk with your words into these secret, mysterious, and magic places where poems lead you." Poetry is a rich and engaging genre that invites readers to study and appreciate the beauty and functions of language. It awakens their sense of the many extraordinary things they can notice in their everyday world. The genre of poetry allows readers to create new and surprising images while also uncovering meaning and exploring emotions. Through the use of rhyme, imagery, and figurative language, readers are exposed to literary devices that remain in our thoughts and create opportunities for reflection and celebration. Poetry offers something for readers of all ages and interests, and it exercises all of our imaginations. What greater joy can young readers experience than discovering something new about themselves, or their world, through reading? Poetry does this. It is the natural bridge between cognitive learning and personal expression.

Enduring Understandings

Student Outcomes Students will: ■ Interpret a variety of poems and their structural elements; ■ Use their senses and create mental images to understand poems; ■ Make connections with various poems and use background knowledge or schema to determine meaning; ■ Ask and answer questions to clarify thinking and deepen understanding; ■ Use strategies before, during, and after reading to aid comprehension; ■ Apply self-monitoring skills and strategies to interpret vocabulary; ■ Read and compare poems by examining how the structural elements of each poem affect the reading and can help clarify understanding; ■ Recognize that reading a poem completely from beginning to end and that repeated readings can heighten the readers' understanding of a poem even if some words are unclear; ■ Apply self-monitoring skills and employ fix-up strategies when meaning breaks down; ■ Learn how rhyme, alliteration, and onomatopoeia impact the way a poem is read and understood; ■ Analyze poems for a variety of literary elements, including elements of structure (stanzas, verse), figurative language, and other crafting techniques, such as line breaks and white space; ■ Deepen their understanding of author's purpose; ■ Interpret words and phrases in order to notice and/or discuss how these words and phrases shape meaning and enhance mood and tone; ■ Recognize qualities that enhance poetry, such as shared observations of the world, messages or big ideas that are revealed, and opportunities to infer purpose and inspiration; ■ Understand how poets create images with language and that it's the reader's job to visualize the poem to build understanding; ■ React to a poem using drawings, movements, and/or performances; and ■ Uncover themes and big ideas within and across poems through making inferences and synthesizing thoughts and ideas. The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be offered leveled texts based on skill and interest.

Modifications & Accommodations

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

End of Unit Assessment

Comprehension Questions

Reflections and personal connections

Text to text connections

Aimsweb

Linkit testing 3 times a year.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

discussion

Teacher observation

worksheets

conferencing

teacher made texts

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
