Content Area: **English**
Course(s):
Time Period: **September**
Length: **6-8 Weeks**
Status: **Published**

Unit Overview

Students will learn the functioning of a Writer's Workshop in the 5th grade classroom. Students will understand how to work with a partner, how to listen and share respectfully and what to do if you are stuck or if you think you're done. Students will explore new and familiar ways to use a Writer's Notebook and be encouraged to write daily. Students will learn to understand the writing process and get to know how and why writers write in the ways that they do.

Enduring Understandings

Writer's Workshop is a classroom process that helps us to work together to become better writers.

By studying other writers, we can learn how to emulate the writing process in different genres.

Essential Questions

How does the Writer's Workshop format help me become a better, more independent writer?

What techniques do good writers use when they write?

Interdisciplinary Connections

"How Writers work" teaches writing skills that can be applied to all disciplines. Students will encounter connections to science, social studies and more through the anchor texts and individual choice of topics.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Through choices, students will be able to receive differentiated instruction, both for high level and struggling students.

High level learners will be encouraged to utilize more advanced methods of research to expand their writing and exercise their writing skills.

Modifications to writing projects will be offered to students needing support.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

IEP's will be followed, and additional support and practice will be supplemented for students in need.

Benchmark Assessments

- **Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

LInkit 3 X a year, AimsWeb testing and writing samples

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Worksheets associated with the unit

Conferences

Discussion

rough drafts and revisions

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self Reflection:

uses a self reflection questionnaire

Rationale: Writers become independent learners as they take part in the evaluation process. Students will reflect on the writing process and strategies they used.
