Unit Overview

The beginning of the school year is an exciting time! Students enter their classrooms with a heightened sense of curiosity and wonder. First impressions go a long way for young learners, and it is important for them to experience a comfortable and engaging invitation into their literacy-rich environment. Brightly decorated bulletin boards, shiny desks and tables, and beautifully organized books await your students. The start of each new school year provides opportunities for you and your students to create a community of learners who respect, listen to, share, and respond to the thoughts and ideas of others. This is especially important when considering your community of readers.

Enduring Understandings

Students will: n Develop an understanding of themselves as readers; n Learn to self-select appropriate texts; n Set goals for themselves as readers; n Learn the expectations and routines for actively participating in a reading community; n Learn how to participate in a range of collaborative conversations about texts; n Learn how to follow agreed-upon rules and protocol for conversations; n Learn how to prepare for conversations; n Learn to identify the theme of a text from details in the text; n Learn to cite textual evidence to support analysis of a text; n Learn to determine the central idea of a text and how it is conveyed; n Recognize the differences among books that entertain, inform, and persuade, drawing on a wide reading of a range of text types, including fiction, poetry, and nonfiction; n Develop habits of mind for engaging with a variety of texts; n Learn how to apply self-monitoring skills; and n Learn how to determine the meaning of challenging vocabulary words and phrases in a text.

The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

Interdisciplinary Connections

Various disciplines will be explored through group texts and individual leveled, choice texts.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.

- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will have access to leveled libraries of a variety of texts and be able to choose based on interest.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

IEP and 504 accommodations will be utilized.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

Aimsweb

Linkit testing 3 times a year.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and

can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher observation

worksheets

projects

teacher made tests

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
