## Unit Overview

---

Nonfiction is a rich, engaging genre offering a variety of topics that will entice any reader! Students will spend a great deal of time in school (and their lives outside of school) reading nonfiction, from newspaper articles to textbooks, from recipes to biographies, from travel brochures to informational web sites. Reading nonfiction is empowering. So often students feel like "experts" on the topics or subjects they have read about. Nonfiction reading sparks students' curiosity and opens their eyes to new worlds and different points of view. Nonfiction has so much to offer readers and is an essential genre to study.

## Enduring Understandings

---

Students will: n Read a variety of types of nonfiction, including reference, literary nonfiction, and biography; n Use knowledge of genre, text structure, and text features to support understanding; n Use comprehension strategies before, during, and after reading to monitor and deepen comprehension; n Employ a repertoire of strategies and self-monitoring skills to figure out unfamiliar vocabulary while reading; n Use textual evidence to support thinking about nonfiction reading in both conversation and writing; n Infer an author's purpose or viewpoint; n Summarize and synthesize information to determine important ideas; n Analyze the impact of the author's language choices on the meaning and tone of the text; n Analyze and evaluate arguments presented in nonfiction texts; n Synthesize and compare information across texts and in various formats (e.g., print, visual); and n Determine and pursue meaningful goals for enhancing the reading of nonfiction.

The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

## **Differentiation**

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

Students will have access to leveled libraries of a variety of texts and be able to choose based on interest.

## **Modifications & Accommodations**

---

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

### **Modifications and Accommodations used in this unit:**

IEP and 504 accommodations will be utilized.

## **Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

### **Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

### **Additional Benchmarks used in this unit:**

Aimsweb

Linkit testing 3 times a year.

## **Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

### **Formative Assessments used in this unit:**

Discussion

Teacher observation

worksheets

projects

teacher made tests

## **Summative Assessments**

---

**Summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

### **Summative assessments for this unit:**

Unit assessments

Summative Assessment Students will read the articles “From Walking Machines to Ten Speeds: A History of Bicycles” by Ed Combs and “The Candy Man” by Ed Combs in order to answer selected and constructed response questions.
