

Nov. Writing: Functional Writing

Content Area: **English**
Course(s):
Time Period: **November**
Length: **4-5 Weeks**
Status: **Published**

Unit Overview

Text Type: Opinion/Argument

Functional writing is real-world writing. It is practical or persuasive in purpose and intended for a specific audience. Therefore, it is an excellent genre for students to immerse themselves in because they are already involved with and surrounded by functional writing in their homes, at school, and everywhere they go. Functional writing is particularly engaging for emergent writers and readers who are learning about words and reading familiar text in their environments. Schoolwide’s FUNctional Writing unit celebrates many of the different types of functional writing from our daily lives, such as letters and cards, lists and recipes, maps and signs, schedules and invitations, and condolence and thank you notes. The mentor texts are comprised of charming stories with endearing characters, and each book helps teachers emphasize the “fun” in functional.

Enduring Understandings

Functional writing means giving us a way to communicate with writing in our daily lives.

Essential Questions

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be supported through differentiation, based on needs and ability as individuals.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

IEP accommodations, and individual instruction, as needed.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per

month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

Self Assessment

Conferences

Performance Check List

Teacher Observation

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher conferences

Anecdotal records

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self-Reflection - uses a self-reflection questionnaire.

Rationale: Writers use self-reflection to learn and grow and to make decisions about what kind of writing to try

next. Students will conduct a self-assessment to measure how they have grown as writers.
