

Dec. K. Art

Content Area: **Art**
Course(s):
Time Period: **December**
Length: **4-5 Weeks**
Status: **Published**

Unit Overview

Students are introduced to basic colors and geometric shapes and use them to create art.

Enduring Understandings

Colors and shapes can help us to create and enjoy artwork.

Essential Questions

How can we use shapes and employ color to create visually pleasing artwork?

Instructional Strategies & Learning Activities

Kindergarten

December

| Objectives | Suggested Activities | Evaluations | Resources |
|--|--|---|------------------------|
| Discuss and use the color wheel for: -Primary colors -Secondary colors -warm colors -cool colors | Create an image like Piet Mondrian on a mouse shape to include in the mouse play. Use geometric shapes in primary colors with black tape and tempera paint sticks. | Teacher observation Are the shapes geometric and the colors primary? | Piet Mondrian's images |

| | | | |
|--|--|--|--|
| <p>Identify and use Geometric shapes</p> | <p>-make a grid with black lines</p> <p>-color primary color squares into grid like Mondrian</p> | | |
|--|--|--|--|

Integration of Career Readiness, Life Literacies and Key Skills

| | |
|-----------------|---|
| WRK.9.1.2.CAP | Career Awareness and Planning |
| WRK.9.1.2.CAP.1 | Make a list of different types of jobs and describe the skills associated with each job. |
| TECH.9.4.2.CI | Creativity and Innovation |
| TECH.9.4.2.CI.1 | Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2). |
| TECH.9.4.2.CI.2 | Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a). |
| TECH.9.4.2.CT.3 | <p>Use a variety of types of thinking to solve problems (e.g., inductive, deductive).</p> <p>Critical thinkers must first identify a problem then develop a plan to address it to effectively solve the problem.</p> <p>Different types of jobs require different knowledge and skills.</p> |

Technology and Design Integration

Students will interact with the unit using the Smartboard.

Interdisciplinary Connections

| | |
|------------|---|
| LA.SL.K.1 | Participate in collaborative conversations with diverse partners about kindergarten topics and texts with peers and adults in small and larger groups. |
| LA.SL.K.3 | Ask and answer questions in order to seek help, get information, or clarify something that is not understood. |
| MA.K.G.A | Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres). |
| MA.K.G.A.1 | Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to. |
| MA.K.G.A.2 | Correctly name shapes regardless of their orientations or overall size. |

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Encourage risk taking in creating thier pictures as opportunities to stretch skills during production.

Support students with motor skills needed to manipulate art materials.

Actively assess to identify student interests, learning preferences and the ability to work independently.

For Gifted:

Encourage students to explore concepts in depth and encourage independent studies or investigations. Use thematic instruction to connect learning across the curriculum. Encourage creative expression and thinking by allowing students to choose how to approach a problem or assignment. Expand students' time for free reading. Invite students to explore different points of view on a topic of study and compare the two. Provide learning centers where students are in charge of their learning. Brainstorm with gifted children on what types of projects they would like to explore to extend what they're learning in the classroom. Determine where students' interests lie and capitalize on their inquisitiveness. Refrain from having them complete more work in the same manner. Employ differentiated curriculum to keep interest high. Avoid drill and practice activities. Ask students' higher level questions that require students to look into causes, experiences, and facts to draw a conclusion or make connections to other areas of learning. If possible, compact curriculum to allow gifted students to move more quickly through the material. Encourage students to make transformations- use a common task or item in a different way. From

Modifications & Accommodations

Follow all IEP and 504 accommodations as specified.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

DRA, Aimsweb for math and language arts.

Teacher observation and recording of progression of skills

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussions

Frequent conferencing with students throughout the process. Making adjustments to instruction as needed.

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Teacher observation

Are the shapes geometric and the colors primary?

Instructional Materials

Piet Mondrian's images

Art materials as required

Standards

| | |
|-------------------|--|
| VA.K-2.1.5.2.Cr | Creating |
| VA.K-2.1.5.2.Cr1 | Generating and conceptualizing ideas. |
| VA.K-2.1.5.2.Pr5 | Developing and refining techniques and models or steps needed to create products. |
| VA.K-2.1.5.2.Pr6 | Conveying meaning through art. |
| VA.K-2.1.5.2.Re9 | Applying criteria to evaluate products. |
| VA.K-2.1.5.2.Cr1a | Engage in individual and collaborative exploration of materials and ideas through multiple approaches, from imaginative play to brainstorming, to solve art and design problems. |
| VA.K-2.1.5.2.Cr1b | Engage in individual and collaborative art making through observation and investigation of the world, and in response to personal interests and curiosity. |
| VA.K-2.1.5.2.Cr3a | Explain the process of making art, using art vocabulary. Discuss and reflect with peers about choices made while creating art. |
| VA.K-2.1.5.2.Re9a | Use art vocabulary to explain preferences in selecting and classifying artwork. |
| | Reflect, Refine, Continue |
| | Explore |
