

Sept. Art Grade 1

Content Area: **Art**
Course(s):
Time Period: **September**
Length: **4 Weeks**
Status: **Published**

Unit Overview

Students will explore art in the following areas:

Identify and use geometric shapes and forms

Use oil pastels techniques for blending color

Use color to describe temperature and/or mood

Discuss environments on other planets

Enduring Understandings

Art is a way to express yourself and your understanding of the world around you.

Essential Questions

How does recognizing shapes help us to create art?

How do you use the medium of pastels, and what techniques are there that can enhance their use?

How does color describe temperature and mood?

How does one's lifestyle impact its environment?

What innovations must be implemented to create a sustainable environment?

Instructional Strategies & Learning Activities

| Objectives | Suggested Activities | Evaluations | Resources |
|------------|----------------------|-------------|-----------|
|------------|----------------------|-------------|-----------|

| | | | |
|---|--|---------------------|----------------------------|
| Identify and use geometric shapes | Read <u>Lil Bots</u> | Teacher observation | <u>Lil Bots</u> |
| Use oil pastels techniques for blending color | Discuss functions of a robot | Gallery walk | Images of geometric shapes |
| Use color to describe temperature and/or mood | Draw self portrait as a robot on a planet and the environment using oil pastels on 12x18 paper | | Images of planets |
| Discuss environments on other planets | | | |
| and what is essential for sustainability in one's environment | | | |

Integration of Career Readiness, Life Literacies and Key Skills

| | |
|-----------------|--|
| WRK.9.1.2.CAP | Career Awareness and Planning |
| WRK.9.1.2.CAP.1 | Make a list of different types of jobs and describe the skills associated with each job. |
| TECH.9.4.2.CI | Creativity and Innovation |
| TECH.9.4.2.CI.2 | Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a). |
| TECH.9.4.2.CT.3 | Use a variety of types of thinking to solve problems (e.g., inductive, deductive). |

Technology and Design Integration

Students will design a robot and discuss the functions of a robot.

| | |
|-------------------|--|
| CS.K-2.8.2.2.ED.1 | Communicate the function of a product or device. |
| CS.K-2.8.2.2.ED.2 | Collaborate to solve a simple problem, or to illustrate how to build a product using the design process. |
| CS.K-2.8.2.2.ED.3 | Select and use appropriate tools and materials to build a product using the design process. |
| CS.K-2.8.2.2.ED.4 | Identify constraints and their role in the engineering design process. |
| CS.K-2.ED | Engineering Design |

Interdisciplinary Connections

Students discuss the impact of scientific advancement as reflected in a culture's art and music. We play Kraftwerk while we work, as they were the first band to use computer generated sound in their work.

| | |
|------------|--|
| MA.1.G.A.1 | Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes. |
| MA.1.G.A.2 | Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. |
| LA.SL.1.1 | Participate in collaborative conversations with diverse partners about grade 1 topics and texts with peers and adults in small and larger groups. |

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be encouraged to create images to the best of their skill levels.

For Gifted:

Encourage students to explore concepts in depth and encourage independent studies or investigations. Use thematic instruction to connect learning across the curriculum. Encourage creative expression and thinking by allowing students to choose how to approach a problem or assignment. Expand students' time for free reading. Invite students to explore different points of view on a topic of study and compare the two. Provide learning centers where students are in charge of their learning. Brainstorm with gifted children on what types of projects they would like to explore to extend what they're learning in the classroom. Determine where students' interests lie and capitalize on their inquisitiveness. Refrain from having them complete more work in the same manner. Employ differentiated curriculum to keep interest high. Avoid drill and practice activities.

Ask students' higher level questions that require students to look into causes, experiences, and facts to draw a conclusion or make connections to other areas of learning. If possible, compact curriculum to allow gifted students to move more quickly through the material. Encourage students to make transformations- use a common task or item in a different way. Modifications & Accommodations

Support the use of the media, based on IEP and/or individual skill levels.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Observation

Discussion

Benchmark Assessments

No Benchmark is used for this unit

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Final art project

Gallery Walk

Instructional Materials

Book

Pastels

Black paper

shapes cut from various media

glue

markers

Images of planets

Standards

| | |
|--------------------|--|
| VA.K-2.1.5.2.Cr1a | Engage in individual and collaborative exploration of materials and ideas through multiple approaches, from imaginative play to brainstorming, to solve art and design problems. |
| VA.K-2.1.5.2.Cn11 | Relating artistic ideas and works within societal, cultural and historical contexts to deepen understanding. |
| VA.K-2.1.5.2.Cn11b | Describe why people from different places and times make art about different issues, including climate change. |
