

May Grade 2 Art

Content Area: **Art**
Course(s):
Time Period: **May**
Length: **4-5 Weeks**
Status: **Published**

Unit Overview
This unit explores realistic landscapes in watercolor.

Enduring Understandings
Specific rules and techniques apply to drawing realistic landscapes with watercolors.

Essential Questions
How can we represent realistic landscapes with watercolors?

Instructional Strategies & Learning Activities

| Objectives | Suggested Activities | Evaluations | Resources |
|--|---|---------------------|----------------------------|
| Create a landscape drawing from direct observation | Spring landscape with stamps 12x18 paper | Gallery walk | Master landscape paintings |
| Fore, mid and background | Draw a rectangular frame on 12x18 paper using a pencil | Teacher observation | Cezanne |
| Draw and paint trees in perspective | Draw landscape with a fore, mid and background in pencil. | | Fauvist landscape |
| Use a stamp to create a | | | |

| | | | |
|---------------------------|--|--|---------------|
| patterned theme in border | Color with tempera or watercolor | | William Lewis |
| | Paint outside frame in solid color, use color bug stamps to create a repeating pattern | | |

Integration of Career Readiness, Life Literacies and Key Skills

Students will learn about Cezanne's career as an artist.

| | |
|-----------------|--|
| WRK.9.1.2.CAP | Career Awareness and Planning |
| WRK.9.1.2.CAP.1 | Make a list of different types of jobs and describe the skills associated with each job. |
| TECH.9.4.2.CI.1 | Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2). |
| TECH.9.4.2.CI.2 | Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a). |
| TECH.9.4.2.CT | Critical Thinking and Problem-solving |
| TECH.9.4.2.CT.3 | Use a variety of types of thinking to solve problems (e.g., inductive, deductive). |

Technology and Design Integration

Students will view a variety of landscapes on the smartboard

Interdisciplinary Connections

| | |
|-------------|---|
| MA.2.MD.A.1 | Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. |
| MA.2.G.A | Reason with shapes and their attributes. |
| LA.SL.2.1.C | Ask for clarification and further explanation as needed about the topics and texts under discussion. |
| LA.SL.2.3 | Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a topic or issue. |

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to

address before students move on.

- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.
- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be encouraged to improve and challenge their art skills as they proceed.

Simpler instructions and tasks will be assigned for struggling students

For Gifted:

Encourage students to explore concepts in depth and encourage independent studies or investigations. Use thematic instruction to connect learning across the curriculum. Encourage creative expression and thinking by allowing students to choose how to approach a problem or assignment. Expand students' time for free reading. Invite students to explore different points of view on a topic of study and compare the two. Provide learning centers where students are in charge of their learning. Brainstorm with gifted children on what types of projects they would like to explore to extend what they're learning in the classroom. Determine where students' interests lie and capitalize on their inquisitiveness. Refrain from having them complete more work in the same manner. Employ differentiated curriculum to keep interest high. Avoid drill and practice activities. Ask students' higher level questions that require students to look into causes, experiences, and facts to draw a conclusion or make connections to other areas of learning. If possible, compact curriculum to allow gifted students to move more quickly through the material. Encourage students to make transformations- use a common task or item in a different way. From

Modifications & Accommodations

In addition to the differentiation above, individual IEP's and 504's will be accommodated.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Students will show evidence of proportions throughout the lesson through questioning and observation of drawing

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Teacher observations during the process

Discussion

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an

instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Gallery walk

Teacher observation

Instructional Materials

Master landscapes

Cezanne

Fauvist landscape

William Lewis

Watercolors

art supplies

Standards

| | |
|-------------------|--|
| VA.K-2.1.5.2.Cr | Creating |
| VA.K-2.1.5.2.Cr1 | Generating and conceptualizing ideas. |
| | Explore |
| VA.K-2.1.5.2.Cr1a | Engage in individual and collaborative exploration of materials and ideas through multiple approaches, from imaginative play to brainstorming, to solve art and design problems. |
| VA.K-2.1.5.2.Cr1b | Engage in individual and collaborative art making through observation and investigation of the world, and in response to personal interests and curiosity. |
| VA.K-2.1.5.2.Cr3 | Refining and completing products. |
| VA.K-2.1.5.2.Cr3a | Explain the process of making art, using art vocabulary. Discuss and reflect with peers about choices made while creating art. |
| VA.K-2.1.5.2.Pr5 | Developing and refining techniques and models or steps needed to create products. |
| VA.K-2.1.5.2.Re9 | Applying criteria to evaluate products. |
