

Pillon update Grade 2 Art: September

Content Area: **Art**
Course(s):
Time Period: **September**
Length: **4 weeks**
Status: **Published**

Unit Overview

Identify basic shapes in complex structures as a method to improve drawing skills

Identify warm and cool colors

Increase skills for watercolor painting: wet on wet techniques

Principle of design discussed: balance

Enduring Understandings

Identifying shapes in complex structures improve drawing skills.

Colors can be classified as cool or warm.

Balance is a principle of design that enhances artwork.

Wet on wet watercolor techniques enhance artwork.

Essential Questions

How does identifying shapes, distinguishing between warm and cool colors, learning watercolor techniques, and understanding balance improve my artwork?

Instructional Strategies & Learning Activities

Objectives	Suggested Activities	Evaluations	Resources
Identify basic shapes in complex structures as a method to improve drawing skills	Each table will have a variety of silk flowers scattered for choosing.	Peer critique	Georgia O'Keefe's flower

Identify warm and cool colors	Students will choose at least 3 different flowers to draw lightly in pencil achieving a balanced composition. At least 2 flowers should overlap and at least 2 should extend off the edges of the 6x9 paper.	Greatest balance, color choices and neatness	paintings.
Increase skills for watercolor painting: wet on wet techniques			
Principle of design discussed: balance			

Integration of Career Readiness, Life Literacies and Key Skills

Peer Critique and discussion of creative works.

Students will learn about the successful career of the artist Georgia O'Keefe.

TECH.9.4.2.CI	Creativity and Innovation
TECH.9.4.2.CT	Critical Thinking and Problem-solving
TECH.9.4.2.CI.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
WRK.9.2.2.CAP.1	Make a list of different types of jobs and describe the skills associated with each job.
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
WRK.9.2.2.CAP	Career Awareness and Planning

Technology and Design Integration

Students will view artwork displayed on the Smartboard.

Interdisciplinary Connections

Students will make connections with math when duplicating shapes they see in nature.

CCSS.Math.Content.2.G.A.1	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.
---------------------------	---

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be encouraged to improve and challenge their art skills as they proceed.

Simpler instructions and tasks will be assigned for struggling students.

for Gifted:

Encourage students to explore concepts in depth and encourage independent studies or investigations. Use thematic instruction to connect learning across the curriculum. Encourage creative expression and thinking by allowing students to choose how to approach a problem or assignment. Expand students' time for free reading. Invite students to explore different points of view on a topic of study and compare the two. Provide learning centers where students are in charge of their learning. Brainstorm with gifted children on what types of projects they would like to explore to extend what they're learning in the classroom. Determine where students' interests lie and capitalize on their inquisitiveness. Refrain from having them complete more work in the same manner. Employ differentiated curriculum to keep interest high. Avoid drill and practice activities. Ask students' higher level questions that require students to look into causes, experiences, and facts to draw a conclusion or make connections to other areas of learning. If possible, compact curriculum to allow gifted students to move more quickly through the material. Encourage students to make transformations- use a common task or item in a different way. From

Modifications & Accommodations

In addition to the differentiation above, individual IEP's and 504's will be accommodated.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Teacher observation and documentation of growth over time.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Teacher observations during the process

Discussion

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Peer critique

Greatest balance, color choices and neatness

Instructional Materials

Art supplies

Georgia O'Keefe painting pictures

Standards

VPA.1.1.2	All students will demonstrate an understanding of the elements and principles that govern the creation of works of art in dance, music, theatre, and visual art.
VPA.1.3.2.D.CS1	Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art. There are also a wide variety of art media, each having its own materials, processes, and technical application methods for exploring solutions to creative problems.
VPA.1.3.2.D.1	Create two- and three-dimensional works of art using the basic elements of color, line, shape, form, texture, and space, as well as a variety of art mediums and application methods.
VPA.1.4.2.B.CS2	Constructive criticism is an important evaluative tool that enables artists to communicate more effectively.
VPA.1.3.2.D.4	Explore the use of a wide array of art mediums and select tools that are appropriate to the production of works of art in a variety of art media.
VPA.1.3.2.D.CS5	Visual awareness stems from acute observational skills and interest in visual objects, spaces, and the relationship of objects to the world.
VPA.1.4.2.A.1	Identify aesthetic qualities of exemplary works of art in dance, music, theatre, and visual art, and identify characteristics of the artists who created them (e.g., gender, age, absence or presence of training, style, etc.).
