Unit Overview, Guidance

The philosophy and mission of the school counselors in the Delaware Township School District is to meet the social/emotional, academic and career needs of our students. We utilize a developmental counseling approach, which involves a planned, proactive, and preventative model to address the developmental needs of our students. We serve the entire school community so that our students have every opportunity to become responsible, emotionally healthy individuals who are capable of utilizing their full potential.

Delaware Township School District Counseling Program

Elementary & Intermediate Schools

The elementary and intermediate school counseling program focuses on the implementation of a comprehensive, developmental model that addresses the academic, personal/social, and career needs of students. Counselors work collaboratively with staff, students, and parents to provide services ranging from prevention to crisis management. Counselors are specially trained to provide a variety of services including classroom lessons, individual and group counseling, consultation, as well as appropriate referral services. The counselors strive to promote and maintain a highly approachable, visible, and supportive role within the school community.

Middle School

The middle school counseling program offers a developmental curriculum in the areas of education, career exploration, and personal/social issues. Counselors help to facilitate the social, emotional, and academic functioning of all students. They work with students to transition smoothly into and out of the middle school. The curriculum is carried out through classroom activities and via individual and group counseling. Daily communication with parents and staff members is an integral part of the counseling role, aiding in communication among families, teachers, and students. When appropriate, counselors collaborate with community and state agencies to provide comprehensive services to the students. Middle school counselors work with their students and Hunterdon Central Regional School District high school counselors to select courses for ninth grade as well as to develop a tentative four-year high school plan.

Special Education

School counselors and child study team members work collaboratively to ensure that beginning with the Individualized Education Program (IEP) in place for the school year when the student will turn 14, or younger if determined appropriate by the IEP team, a statement of the student's strengths, interests and preferences and identification of a course of study and related strategies and activities that are consistent with the student's strengths, interests, and preferences is included. This is intended to assist the student in developing or attaining postsecondary goals related to training, education, employment and, if appropriate, independent living. As appropriate, a description of the need for consultation from other agencies that provide services for students with disabilities is included in programming.

For our Preschool Inclusion classes, the classroom teacher implements Creative Curriculum For Preschool, which is a program that implements social and emotional goals and objectives such as a developing a sense of self, taking responsibility for self and others, and encouraging pro-social behaviors.

For middle school students, transition services for students with disabilities consist of a coordinated set of activities designed within a results-oriented process, focused on improving academic and functional achievement and facilitating movement from school to post-school activities. These transition services include instruction, related services, community experiences, the development of employment and other post-school adult living objectives and if appropriate, acquisition of daily living skills and functional vocational evaluations. The child study team case managers are designated to serve as a liaison to resources, and make referrals to those resources as appropriate for students with disabilities.

| CS.K-2.ETW | Effects of Technology on the Natural World |
| TECH.8.1.2.D.CS1 | Advocate and practice safe, legal, and responsible use of information and technology. |

The use of technology developed for the human designed world can affect the environment, including land, water, air, plants, and animals. Technologies that use natural sources can have negative effects on the environment, its quality, and inhabitants. Reusing and recycling materials can save money while preserving natural resources and avoiding damage to the environment.

Computing technology has positively and negatively changed the way individuals live and work (e.g., entertainment, communication, productivity tools).

Engineering design is a creative process for meeting human needs or wants that can result in multiple solutions.

The availability of technology for essential tasks varies in different parts of the world.

Technology has changed the way people live and work. Various tools can improve daily tasks and quality of life.
