Unit 3 Reveal Grade K

Content Area: Math

Course(s): Language Arts, Art

Time Period: October
Length: 4 weeks
Status: Published

Unit Overview

UNIT 3 PLANNER Numbers to 10

PACI	NG: 18 days					
LESSO	ON	MATH OBJECTIVE	LANGUAGE OBJECTIVE	SOCIAL AND EMOTIONAL LEARNING OBJECTIVE	LESSON	KEY VOCABULARY
Unit O	pener IsMitel How I	Many Can You Find? Explore counting	groups of objects up to 10			
3-1	Count 6 and 7	Understand the relationship between numbers and quantities when using objects and illustrations to court 6 and 7.	Express the relationship between numbers and quantities to count to 6 and 7 using comparative words.	Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.	3-1	Math Terms six seven
3-2	Represent 6 and 7	Count groups of objects to 7, regardless of their arrangement, and recognize the numerals 6 and 7.	Express the number of objects to 7, regardless of their arrangement, using the correct subject/verb agreement.	Students set learning goals and initiate work on tasks to accomplish their goals.	3-2	six seven
3-3	Count 8 and 9	Understand the relationship between numbers and quantities when using objects and illustrations to count 8 and 9.	Express the relationship between numbers and quantities to count to 8 and 9 using comparative words.	Students identify personal traits that make them good students, peers, and math learners.	3-3	cight nine
3-4	Represent 8 and 9	Count groups of objects to 9, regardless of their arrangement, and recognize the numerals 8 and 9.	Express the number of objects to 9, regardless of their arrangement, using the structure there is/there are.	Students engage in respectful discourse with peers about various perspectives for approaching a mathematical challenge.	3-4	cight nine
3-5	Count 10	Understand the relationship between numbers and quantities when using objects and illustrations to count 10.	Express the relationship between numbers and quantities to count to 10 using comparative words.	Students practice strategies for pessisting at a mathematical tack, such as setting a small goal or setting timers for remaining focused.	3-5	ten
3-6	Represent 10	Count groups of objects to 10, regardless of their arrangement, and recognize the numeral 10.	Express the number of objects to 10, regardless of their arrangement, using the correct subject/verb agreement.	Students demonstrate self-awareness of personal strengths and areas of challenge in mathematics.	3-6	ten
3-7	Numbers to 10	Identify numbers from 1 to 10 in sequence understanding that each successive number name is referring to an amount that is one larger.	Express numbers from 1-10 in sequence and respond to questions about successive numbers using the future tense phrase, there will be.	Students exchange ideas for completing a mathematical task with a peer and reflect on the value of their similarities and differences.	3-7	one more
3-8	Compare Objects in Groups	Use one-to-one correspondence and counting to compare two groups.	Compare two groups using equal to, less than, lewer than, and more than.	Students develop and execute a plan, including selecting tools for mathematical problem solving.	3-8	equal; fewer; more
3-9	Compare Numbers	Use counting to compare two numbers.	Compare two numbers using equal to, less than, or greater than.	Students collaborate with peers to complete a mathematical task and offer constructive feedback to the mathematical ideas posed by others.	3-9	equal groups; greater than; less than
Math F	Probe Compare Nur	mbers Gather data on students' understa	nding of comparing two 1-digit numbers			
3-10	Write Numbers to 3	Write the numerals to 3 and represent a number of objects with a written numeral.	Respond to prepositional phrases such as of the top, over, around, across, down to write numerals zero to three.	Students reflect on and describe the logic and reasoning used to make a mathematical decision or conclusion.	3-10	zero; one; two; three
3-11	Write Numbers to 6	Write the numerals to 6 and represent a number of objects with a written numeral.	Respond to commands such as stort at the top, go down, move across, curve, and close to write numerals four to six.	Students discuss and practice strategies for managing stressful situations.	3-11	four; five; six
3-12	Write Numbers to 10	Write the numerals to 10 and represent a number of objects with a written numeral.	Write numerals 7 to 10 by responding to prepositional phrases such as at the top, over, around, across, and down.	Students demonstrate thoughtful reflection through identifying the causes of challenges and successes while completing a mathematical task.	3-12	seven; eight; nine; ten
Unit R						
	sy Practice ssessment					
	mance Task					

Enduring Understandings

Instructional Strategies and Learning Activities

LESSON 3-1 Count 6 and 7

Learning Targets

- I can count objects to 7.
- . I can explain how to count objects to 7.

Standards • Major A Supporting • Addition

Content

- OK.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
- K.CC.B.A.a When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.

Math Practices and Processes

MPP Model with mathematics.

Focus

Content Objective

 Students understand the relationship between numbers and quantities when using objects and illustrations to count 6 and 7.

Language Objectives

- Students express the relationship between numbers and quantities to count to 6 and 7 using comparative words.
- Optimizing outputs by participating in MLR3: Critique, Correct and Clarify.

SEL Objective

 Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.

Coherence

Previou

 Students counted up to 5 objects (Unit 2).

Now

 Students count objects to 7 and show the quantities using manipulatives or representations.

Nex

- Students count objects up to 19 (Unit 10).
- Students count to 120 (Grade 1).

Rigor

Conceptual Understanding

 Students extend their understanding of pairing each object with one number name when counting.

Procedural Skill & Fluency

- Students develop skill & fluency in counting groups of up to 7 objects.
- Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

- Students use counting skills to find the number of objects in a group.
- Application is not a targeted element of rigor for this standard.

LESSON 3-2 Represent 6 and 7

Learning Targets

- I can show numbers 6 and 7.
- I can explain how to show numbers 6 and 7.

Standards • Major • Supporting • Additional

Content

- CK.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
- K.CC.B.4b Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.

Math Practices and Processes

MPP Attend to precision.

Focus

Content Objectives

- Students count groups of objects to 7, regardless of their arrangement.
- Students recognize the numerals 6 and 7.

Language Objectives

- Students express the number of objects to 7, regardless of their arrangement, using the correct subject/verb agreement.
- Optimizing outputs by participating in MLR4: Information Gap.

SEL Objective

 Students set learning goals and initiate work on tasks to accomplish their goals.

Coherence

Previous

- Students counted objects up to 5, shown in various arrangements (Unit 2).
- Students determined which numeral represented a given quantity of objects, up to 5 (Unit 2).

low

- Students count objects to 7 given in any arrangement.
- Students determine which numeral represents a given quantity of objects, up to 7.

March

- Students represent groups of up to 19 objects (Unit 10).
- Students count to 120 (Grade 1).

Rigor

Conceptual Understanding

 Students extend their understanding that objects can be counted regardless of their arrangement and that numerals represent quantities.

Procedural Skill & Fluency

 Students develop skill & fluency in counting up to 7 objects in different arrangements and representing the total with a numeral.

Procedural skill & fluency is not a targeted element of rigar for this standard.

Application

 Students use numerals to represent groups of up to 7 objects.

Application is not a targeted element of rigor for this standard.

LESSON 3-3 Count 8 and 9

Learning Targets

- . I can count objects to 9.
- I can explain how to count objects to 9.

Standards • Major • Supporting • Additional

Content

- K.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
- K.CC.B.4a When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.

Math Practices and Processes

MPP Model with mathematics.

Focus

Content Objective

 Students understand the relationship between numbers and quantities when using objects and illustrations to count 8 and 9.

Language Objectives

- Students express the relationship between numbers and quantities to count to 8 and 9 using comparative words.
- Support sense-making and to optimize outputs by participating in MLR8: Discussion Supports.

SEL Objective

 Students identify personal traits that make them good students, peers, and math learners.

Coherence

Previous

- Students counted up to 5 objects (Unit 2).
- Students counted 6 or 7 objects (Unit 3).

Now

 Students count objects to 9 and show the quantities using manipulatives or representations.

Next

- Students count objects up to 19
 (Unit 10).
- . Students count to 120 (Grade 1).

Rigor

Conceptual Understanding

 Students extend their understanding of pairing each object with one number name when counting.

Procedural Skill & Fluency

 Students develop skill & fluency in counting groups of up to 9 objects.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use counting skills to find the number of objects in a group.

LESSON 3-4 Represent 8 and 9

Learning Targets

- I can show numbers 8 and 9.
- I can explain how to show numbers 8 and 9.

Standards • Major • Supporting • Additional

Content

- K.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality
- K.CC.B.4.b Understand that the last number name said tells then number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.

Math Practices and Processes

MPP Attend to precision.

Focus

Content Objectives

- Students count groups of objects to 9, regardless of their arrangement.
- Students recognize the numerals 8 and 9.

Language Objectives

- Students express the number of objects to 9, regardless of their arrangement, using the structure there is/there are.
- Optimizing outputs by participating in MLR4: Information Gap.

SEL Objective

 Students engage in respectful discourse with poers about various prespectives for approaching a mathematical challenge.

Coherence

Previous

- Students counted objects up to 7, shown in various arrangements (Unit 3).
- Students determined which numeral represented a given quantity of objects, up to 7 (Unit 3).

Now

- Students count objects to 9 given in any arrangement.
- Students determine which numeral represents a given quantity of objects up to 9.

Most

- Students represent groups of up to 19 objects (Unit 10).
- Students count to 120 (Grade 1).

Rigor

Conceptual Understanding

 Students extend their understanding that objects can be counted regardless of their arrangement and that numerals represent quantities.

Procedural Skill & Fluency

 Students develop skill & fluency in counting up to 9 objects in different arrangements and representing the total with a numeral.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use numerals to represent groups of up to 9 objects.

LESSON 3-5 Count 10

Learning Targets

- I can count objects to 10.
- . I can explain how to count objects to 10.

Standards • Major A Supporting • Additional

Content

- CK.CC.B Count to tell the number of objects.
- CK.CC.B.4 Understand the relationship between numbers and quantities; connect counting
- K.CC.B.4.a When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.

Math Practices and Processes

MPP Model with mathematics

Focus

Content Objective

- · Students understand the relationship between numbers and quantities when using objects and illustrations to count 10.
- Language Objectives
- · Students express the relationship between numbers and quantities to count to 10 using comparative
- Sense-making and to optimize outputs by participating in MLR3: Critique, Correct, and Clarify.

SEL Objective

· Students practice strategies for persisting at a mathematical task, such as setting a small goal or setting timers for remaining focused.

Coherence

Previous

- Students counted up to 5 objects (Unit 2).
- Students counted 8 or 9 objects (Unit 3).

Now

- · Students count objects to 10 and show the quantities using manipulatives or representations.

Next

- · Students count objects up to 19 (Unit 10).
- . Students count to 120 (Grade 1).

Rigor

Conceptual Understanding

· Students extend their understanding of pairing each object with one number name when counting.

Procedural Skill & Fluency

 Students develop skill & fluency
 Students use counting skills to in counting groups of up to 10 objects.

Procedural skill & fluency is not a targeted element of rigar for this standard.

Application

find the number of objects in a group.

Represent 10

Learning Targets

- I can show the number 10.
- I can explain how to show the number 10.

Standards • Major • Supporting • Additional

Content

- K.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
- K.CC.B.4b Understand that the last number name said tells then number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.

Math Practices and Processes

MPP Model with mathematics

Focus

Content Objectives

- Students count groups of objects to 10, regardless of their arrangement.
- . Students recognize the numeral 10.

Language Objectives

- Students express the number of objects to 10, regardless of their arrangement, using the correct subject/verb agreement.
- Optimizing outputs by participating in MLR4: Information Gap.

SEL Objective

 Students demonstrate selfawareness of personal strengths and areas of challenge in mathematics.

Coherence

Previou

- Students counted objects up to 9, shown in various arrangements (Unit 3).
- Students determined which numeral represented a given quantity of objects, up to 9 (Unit 3).

Now

- Students count objects to 10 given in any arrangement.
- Students determine which numeral represents a given quantity of objects up to 10.

Next

- Students represent groups of up to 19 objects (Unit 10).
- s determine which Students count to 120 (Grade 1).
 represents a given

Rigor

Conceptual Understanding

 Students extend their understanding that objects can be counted regardiess of their arrangement and that numerals represent quantities.

Procedural Skill & Fluency

 Students develop skill & fluency in counting up to 10 objects in different arrangements and representing the total with a numeral.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use numerals to represent groups of up to 10 objects.

Numbers to 10

Learning Targets

- . I can identify the number that is one more.
- . I can explain how to identify the number that is one more.

Standards • Major • Supporting • Additional

Content

- K.CC.B Count to tell the number of objects.
- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.
- CK.CC.B.4.c Understand that each successive number name refers to a quantity that is one larger.

Math Practices and Processes

MPP Reason abstractly and quantitatively.

Focus

Content Objective

- Students identify numbers from 1 to 10 in sequence understanding that each successive number name is referring to an amount that is one larger.
- Language Objectives
- Students express numbers from 1-10 in sequence and respond to questions about successive numbers using the future tense phrase, there will be.
- Support sense-making and to optimize outputs by participating in MLRS: Co-Craft Questions and Problems.

SEL Objective

 Students exchange ideas for completing a mathematical task with a peer and reflect on the value of their similarities and differences.

Coherence

Previous

 Students identified the numbers in the counting sequence 1–5 (Unit 2).

Nov

 Students understand that each number in the counting sequence represents a quantity one greater than the preceding number.

Most

Students count to 50 (Unit 12).
 Students count to 120. (Grade 1)

Rigor

Conceptual Understanding

 Students extend their understanding of each successive number name referring to a quantity that is one more than the previous number.

Procedural Skill & Fluency

 Students develop skill & fluency in identifying the number that represents one more than the given quantity.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use counting skills to find the number that is one

LESSON 3-8

Compare Objects in Groups

Learning Targets

- I can use matching and counting to determine if the number of objects in one group is greater than or less than the number of objects in another group.
- I can explain how to compare the number of objects in two groups by matching or counting the objects in each group.

Standards • Major A Supporting • Additional

Content

- K.CC.C Compare numbers.
- K.CC.C.6 Identify whether the number of objects in one group is greater than, less than or equal to the number of objects in another group, e.g., by using matching and counting strategies.

Math Practices and Processes

MPP Reason abstractly and quantitatively.

Focus

Content Objective

- Students use one-to-one correspondence and counting to compare two groups.
- Language Objectives
 Students compare two groups using equal to, less than, fewer
- than, and more than.

 Optimizing outputs by participating in MLRt: Stronger and Clearer Each Time.

SEL Objective

 Students develop and execute a plan, including selecting tools for mathematical problem solving.

Coherence

Previous

 Students compared groups with up to 5 objects (Unit 2).

low

 Students compare the number of objects in two groups by matching and counting.

Next

- Students compare two numerals between 1 and 10 (Unit 3).
- Students compare numbers using inequality symbols (Grade 1).

Rigor

Conceptual Understanding

 Students extend their understanding of comparing two groups by matching and counting groups of up to 10 objects each.

Procedural Skill & Fluency

 Students develop skill & fluency in comparing two groups by matching and counting the objects.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use matching and counting to compare the number of real-world objects in two groups.

LESSON 3-9 Compare Numbers

Learning Targets

Focus Question How do you count, show, compare, and write numbers?

- . I can compare two numbers by counting.
- I can explain how to compare two numbers by counting.

Standards • Major A Supporting • Additional

Content

- K.CC.C Compare numbers.
- K.CC.C.7 Compare two numbers between 1 and 10 presented as written numbers.

Math Practices and Processes

MPP Construct viable arguments and critique the reasoning of others.

Focus

Content Objective

Students use counting to compare two numbers.

Language Objectives

- Students compare two numbers using equal to, less than, greater than.
- Support sense-making and to optimize outputs by participating in MLR4: Information Gap.

SEL Objective

 Students collaborate with peers to complete a mathematical task and offer constructive feedback to the mathematical ideas posed by others.

Coherence

Previous

 Students compared two groups by counting the number of objects in each group (Unit 2).

Now

 Students apply their understanding of counting to compare two numbers presented as numerals.

Next

 Students compare two-digit numbers using inequality symbols (Grade 1).

Rigor

Conceptual Understanding

 Students build their understanding of comparing two numerals.

Procedural Skill & Fluency

 Students begin to build skill & fluency in comparing two numerals using images.

Procedural skill & fluency is not a targeted element of rigor for this standard.

Application

 Students use images to compare the value of two numerals.

Write Numbers to 3

Learning Targets

- I can write numbers to show how many.
- . I can explain how to write numbers to show how many.

Standards • Major • Supporting • Additional

Content

- K.CC.A Know number names and the count sequence.
- K.CC.A.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0–20 (with 0 representing a count of no objects).

Math Practices and Processes

MPP Attend to precision.

Focus

Content Objective

 Students write the numerals to 3 and represent a number of objects with a written numeral.

Language Objectives

- Students respond to prepositional phrases such as at the top, over, around, across, down to write numerals zero to three.
- Optimizing outputs by participating in MLR1: Stronger and Clearer Each Time.

SEL Objective

 Students reflect on and describe the logic and reasoning used to make a mathematical decision or conclusion.

Coherence

Previous

 Students counted groups of objects to 3 (Unit 2).

Now

 Students represent a group with up to 3 objects using a written numeral.

Next

- Students express the quantity of objects in a group with a written numeral, up to 6 (Unit 3).
- Students read and write numerals and represent a number of objects with a writter numeral up to 120 (Grade 1).

Rigor

Conceptual Understanding

 Students understand that the number of objects in a group can be represented with a written numeral.

Procedural Skill & Fluency

 Students build proficiency with writing numerals to 3.

Application

 Students apply their understanding of writing numerals to 3.

LESSON 3-11 Write Numbers to 6

Learning Targets

- I can write numbers to show how many.
- . I can explain how to write numbers to show how many.

Standards • Major • Supporting • Additional

Content

- ♦ K.CC.A Know number names and the count sequence.
- K.CC.A.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0–20 (with 0 representing a count of no objects).

Math Practices and Processes

MPP Attend to precision.

Focus

Content Objective

 Students write the numerals to 6 and represent a number of objects with a written numeral.

Language Objectives

- Students respond to commands such as start at the top, go down, move across, curve, and close to write numerals four to six.
- Optimizing outputs by participating in MLR4: Information Gap.

SEL Objective

 Students discuss and practice strategies for managing stressful situations.

Coherence

Previous

- Students counted groups with up to 10 objects (Unit 3).
- Students represented a group with up to 3 objects using a written numeral (Unit 3).

 Students represent a group with up to 6 objects using a written numeral.

Next

- Students represent a group with up to 10 objects using a written numeral (Unit 3).
- Students represent a group with up to 120 objects using a written numeral (Grade 1).

Rigor

Conceptual Understanding

 Students understand that the number of objects in a group can be represented with a written numeral.

Procedural Skill & Fluency

 Students develop skill & fluency with writing numerals to 6.

Application

 Students write numerals to 6 to show how many objects are in a group.

Integration of Career Readiness, Life Literacies and Key Skills

PFL.9.1.2. FI.1	Differentiate the various forms of money and how they are used (e.g., coins, bills, checks, debit and credit cards).
PFL.9.1.2.CR.1	Recognize ways to volunteer in the classroom, school and community.
PFL.9.1.2.CR.2	List ways to give back, including making donations, volunteering, and starting a business.
PFL.9.1.2.FP.1	Explain how emotions influence whether a person spends or saves.
PFL.9.1.2.FP.3	Identify the factors that influence people to spend or save (e.g., commercials, family, culture, society).

PFL.9.1.2.PB.1	Determine various ways to save and places in the local community that help people save and accumulate money over time.
PFL.9.1.2.PB.2	Explain why an individual would choose to save money.
TECH.9.4.2.Cl.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
TECH.9.4.2.DC.3	Explain how to be safe online and follow safe practices when using the internet (e.g., 8.1.2.NI.3, 8.1.2.NI.4).
TECH.9.4.2.DC.6	Identify respectful and responsible ways to communicate in digital environments.
TECH.9.4.2.DC.7	Describe actions peers can take to positively impact climate change (e.g., 6.3.2.CivicsPD.1).
TECH.9.4.2.TL.2	Create a document using a word processing application.
TECH.9.4.2.TL.5	Describe the difference between real and virtual experiences.
TECH.9.4.2.TL.6	Illustrate and communicate ideas and stories using multiple digital tools (e.g., SL.2.5.).
TECH.9.4.2.TL.7	Describe the benefits of collaborating with others to complete digital tasks or develop digital artifacts (e.g., W.2.6., 8.2.2.ED.2).

Technology and Design Integration

CS.K-2.8.1.2.AP.4	Break down a task into a sequence of steps.
CS.K-2.8.1.2.AP.5	Describe a program's sequence of events, goals, and expected outcomes.
CS.K-2.8.1.2.CS.1	Select and operate computing devices that perform a variety of tasks accurately and quickly based on user needs and preferences.
CS.K-2.8.1.2.DA.1	Collect and present data, including climate change data, in various visual formats.
CS.K-2.8.1.2.DA.3	Identify and describe patterns in data visualizations.
CS.K-2.8.1.2.DA.4	Make predictions based on data using charts or graphs.
CS.K-2.8.2.2.ITH.4	Identify how various tools reduce work and improve daily tasks.

Interdisciplinary Connections

LA.W.K.5	With guidance and support from adults, strengthen writing through response and self-reflection using questions and suggestions from peers (e.g., adding details).
LA.RI.K	Reading Informational Text
LA.RI.K.1	With prompting and support, ask and answer questions about key details in a text.
LA.RI.K.2	With prompting and support, identify the main topic and retell key details of a text.
LA.RI.K.3	With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.
LA.RI.K.4	With prompting and support, ask and answer questions about unknown words in a text.
LA.RI.K.7	With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).

LA.RI.K.8	With prompting and support, identify the reasons an author gives to support points in a text.
LA.RI.K.10	Actively engage in group reading activities with purpose and understanding.
LA.RL.K.4	Ask and answer questions about unknown words in a text.
LA.SL.K	Speaking and Listening
LA.SL.K.1	Participate in collaborative conversations with diverse partners about kindergarten topics and texts with peers and adults in small and larger groups.
LA.SL.K.2	Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.
LA.SL.K.3	Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

• Definitions of Differentiation Components:

- Content the specific information that is to be taught in the lesson/unit/course of instruction.
- o Process how the student will acquire the content information.
- Product how the student will demonstrate understanding of the content.
- Learning Environment the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Exit Ticket: Use Data to Inform Differentiation

Every lesson closes with an Exit Ticket. Differentiation recommendations reside in the Teacher Edition to make the Exit Ticket data actionable.

•

Modifications and Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMOCATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Reveal Unit assessments

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Teacher	ohear	ryation
Teacher	onsei	rvalion

Checklists

Questioning and Discussion

Quizzes

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

End of Unit assessments

Instructional Materials

See above

Standards

MA.K.CC.A.3	Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).
MA.K.CC.B.4a	When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.
MA.K.CC.B.4b	Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.
MA.K.CC.B.4c	Understand that each successive number name refers to a quantity that is one larger.
MA.K.CC.C.6	Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.
MA.K.CC.C.7	Compare two numbers between 1 and 10 presented as written numerals.
