Instructional Strategies and Learning Activities

Counting Patterns to 100

Learning Targets

- I can identify patterns with numbers to 100.
- . I can describe patterns when counting to 100.

Standards • Major • Supporting • Additional

Content

• 1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.

Math Practices and Processes

MP8 Look for and express regularity in repeated reasoning.

Focus

Content Objective

Students identify patterns when counting to 100.

Language Objectives

- Students use phrasal verbs such as go up by, start at, and comes next to identify patterns when counting to 100.
- Optimizing outputs by participating in MLR3: Critique, Correct, and Clarify.

SEL Objective

 Students practice strategies for persisting at a mathematical task, such as setting a small goal or setting timers for remaining focused.

Coherence

Previous

 Students counted to 100 by tens and ones. (Grade K)

Now

 Students recognize and use patterns when counting to 100.

Next

- Students understand place value of 2-digit numbers. (Unit 3)
- Students describe patterns when counting by 1s within 1,000. (Grade 2)

Rigor

Conceptual Understanding

 Students develop understanding of counting patterns in numbers to 100.

Procedural Skill & Fluency

 Students develop fluency with counting to 100.

Application

 Students apply the counting patterns to solve problems.

Application is not a targeted element of rigor for this standard.

LESSON 2-2

Patterns on a Number Chart to 120

Learning Targets

- I can identify patterns when counting by 1s to 120.
- I can describe how to identify patterns when counting by 1s to 120.

Standards • Major A Supporting • Additional

Content

O 1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.

Math Practices and Processes

MP7 Look for and make use of structure.

MP4 Model with mathematics.

Focus

Content Objective

 Students describe patterns on a number chart.

Language Objectives

- Students use the academic terms continue, go up, and stay the some to describe patterns on a number chart.
- Optimize outputs by participating in MLR7: Compare and Connect.

SEL Objective

 Students break down a situation to identify the problem at hand.

Coherence

Previous

 Students counted to 100 by 1s and tens using a number chart (Grade K).

Now

- Students recognize and use patterns when counting by 1s to 120.
- Students count by 1s to 120.

Next

- Students understand place value of 2-digit numbers (Unit 3).
- Students describe patterns when counting by 1s within 1,000 (Grade 2).

Rigor

Conceptual Understanding

 Students build understanding of counting patterns in numbers to 120.

Procedural Skill & Fluency

 Students develop fluency with counting to 120 using a number chart.

Application

 Students apply number patterns to solve problems within 120.

Application is not a targeted element of rigor for this standard.

LESSON 2-3

Patterns on a Number Line

Learning Targets

- I can identify patterns on a number line when counting to 120.
- . I can explain how to identify patterns on a number line when counting to 120.

Standards • Major A Supporting • Additional

Content

• 1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.

Math Practices and Processes

MP5 Use appropriate tools strategically.

Focus

Content Objective

 Students identify patterns on a number line when counting to 120.

Language Objectives

- Students identify patterns on a number line when counting to 120 using hove to indicate characteristics or other qualities.
- Cultivate conversations by participating in MLR7: Compare and Connect.

SEL Objective

 Students recognize personal strengths through thoughtful self-reflection.

Coherence

Previous

 Students counted by ones up to 100, starting from any number less than 100 (Grade K).

Now

 Students describe patterns on a number line.

Next

- Students understand place value of 2-digit numbers (Unit 3).
- Students describe patterns when counting by 1s within 1,000 (Grade 2).

Rigor

Conceptual Understanding

 Students develop understanding that counting numbers follow a predictable pattern: the digits in the ones place increase by 1 from 0 to 9, then repeat; the digits in the tens place increase by 1 from 0 to 9 when the digits in the ones place change from 9 to 0.

Procedural Skill & Fluency

 Students develop fluency with counting by ones to 120.

Application

 Students apply the patterns with counting numbers to solve problems.

Application is not a targeted element of rigor for this standard.

41A

Unit 2 · Number Patterns

LESSON 2-4

Patterns When Reading and Writing Number

Learning Targets

- I can read numbers to 120.
- I can write numbers to 120.

Standards • Major A Supporting • Additional

Content

O 1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.

Math Practices and Processes

MP7 Look for and make use of structure.

MP8 Look for and express regularity in repeated reasoning.

Focus

Content Objective

 Students can use patterns to read and write numbers to 120.

Language Objectives

- Students describe patterns to read and write numbers to 120 using present tense.
- Optimize outputs by participating in MLR2: Collect and Display.

SEL Objective

 Students actively listen without interruption as peers describe how they approached a complex mathematical task.

Coherence

Daniel III

- Students counted by ones and tens to 100 (Grade K).
- Students wrote numbers from 0 to 20 (Grade K).

low

 Students read and write numbers to 120.

Next

- Students represent a number of objects with a written numeral (Unit 2).
- Students read and write numbers to 1,000 (Grade 2).

Rigor

Conceptual Understanding

 Students extend their understanding of number patterns to read and write numbers to 120.

Procedural Skill & Fluency

 Students develop fluency with reading and writing numbers to 120.

Application

 Students apply number patterns to solve problems involving reading and writing numbers

Application is not a targeted element of rigor for this standard.

LESSON 2-5 Patterns When Representing Objects in a C **Learning Targets** - I can represent a number of objects with a written numeral. - I can explain how to represent a number of objects with a written numeral. Standards • Major A Supporting • Additional Content O M 1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral. Math Practices and Processes MP1 Make sense of problems and persevere in solving them. Language Objectives Content Objective SEL Objective · Students use there is/there are to · Students exchange ideas for . Students can count a number of objects. Students can show how express a number of objects. mathematical problem-solving many with a written numeral. with a peer, listening attentively - Maximize linguistic and cognitive and providing thoughtful and meta-awareness by participating, constructive feedback. in MLR7: Compare and Connect. Coherence · Students represented a number - Students represent a number of of objects in a group with a written numeral 0-20 (Grade K). objects with a written numeral value of 2-digit numbers · Students read and write numbers to 1,000 (Grade 2). Conceptual Understanding Procedural Skill & Fluency · Students develop their · Students develop fluency with · Students apply the number understanding of how to counting objects and writing patterns and counting represent a group of up to 120 objects with a written numeral. numbers up to 120. strategies to solve problems. Application is not a targeted element of rigor for this standard.

51A

Unit 2 · Number Patterns

Integration of Career Readiness, Life Literacies and Key Skills

PFL.9.1.2. FI.1	Differentiate the various forms of money and how they are used (e.g., coins, bills, checks, debit and credit cards).
PFL.9.1.2.CR.1	Recognize ways to volunteer in the classroom, school and community.
PFL.9.1.2.CR.2	List ways to give back, including making donations, volunteering, and starting a business.
PFL.9.1.2.FP.1	Explain how emotions influence whether a person spends or saves.
PFL.9.1.2.FP.3	Identify the factors that influence people to spend or save (e.g., commercials, family, culture, society).

PFL.9.1.2.PB.1	Determine various ways to save and places in the local community that help people save and accumulate money over time.
PFL.9.1.2.PB.2	Explain why an individual would choose to save money.
TECH.9.4.2.Cl.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
TECH.9.4.2.DC.3	Explain how to be safe online and follow safe practices when using the internet (e.g., 8.1.2.NI.3, 8.1.2.NI.4).
TECH.9.4.2.DC.6	Identify respectful and responsible ways to communicate in digital environments.
TECH.9.4.2.DC.7	Describe actions peers can take to positively impact climate change (e.g., 6.3.2.CivicsPD.1).
TECH.9.4.2.TL.2	Create a document using a word processing application.
TECH.9.4.2.TL.5	Describe the difference between real and virtual experiences.
TECH.9.4.2.TL.6	Illustrate and communicate ideas and stories using multiple digital tools (e.g., SL.2.5.).
TECH.9.4.2.TL.7	Describe the benefits of collaborating with others to complete digital tasks or develop digital artifacts (e.g., W.2.6., 8.2.2.ED.2).

Technology and Design Integration

CS.K-2.8.1.2.AP.4	Break down a task into a sequence of steps.
CS.K-2.8.1.2.AP.5	Describe a program's sequence of events, goals, and expected outcomes.
CS.K-2.8.1.2.CS.1	Select and operate computing devices that perform a variety of tasks accurately and quickly based on user needs and preferences.
CS.K-2.8.1.2.DA.1	Collect and present data, including climate change data, in various visual formats.
CS.K-2.8.1.2.DA.3	Identify and describe patterns in data visualizations.
CS.K-2.8.1.2.DA.4	Make predictions based on data using charts or graphs.
CS.K-2.8.2.2.ITH.4	Identify how various tools reduce work and improve daily tasks.

Interdisciplinary Connections

LA.RI.1.1 Ask and answer questions about key details in a text. LA.RI.1.2 Identify the main topic and retell key details of a text.	LA.L.1.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
LA.RI.1.2 Identify the main topic and retell key details of a text. LA.RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text. LA.RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries,	LA.W.1.5	suggestions from peers and self-reflection, and add details to strengthen writing and ideas
LA.RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text. LA.RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries,	LA.RI.1.1	Ask and answer questions about key details in a text.
in a text. LA.RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries,	LA.RI.1.2	Identify the main topic and retell key details of a text.
	LA.RI.1.4	Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
•	LA.RI.1.5	, 5:

LA.RI.1.6	Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
LA.RI.1.7	Use the illustrations and details in a text to describe its key ideas.
LA.RI.1.8	Identify the reasons an author gives to support points in a text and explain the application of this information with prompting as needed.
LA.RI.1.9	Identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).
LA.RI.1.10	With prompting and support, read informational texts at grade level text complexity or above.
LA.SL.1.1	Participate in collaborative conversations with diverse partners about grade 1 topics and texts with peers and adults in small and larger groups.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

• Definitions of Differentiation Components:

- Content the specific information that is to be taught in the lesson/unit/course of instruction.
- o Process how the student will acquire the content information.
- o Product how the student will demonstrate understanding of the content.
- Learning Environment the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Exit Ticket: Use Data to Inform Differentiation

Every lesson closes with an Exit Ticket. Differentiation recommendations reside in the Teacher Edition to make the Exit Ticket data actionable.

•

Modifications and Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMOCATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Reveal Unit assessments

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Teacher observation

Checklists

Questioning and Discussion

Quizzes

Summative Assessments	ive Assessments	ssessmen	ımmative
-----------------------	-----------------	----------	----------

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

End of Unit assessments
