# **Unit 1 Reveal Grade 3**

Content Area: Math
Course(s): Math
Time Period: September
Length: 2 weeks
Status: Published

# **Unit Overview**

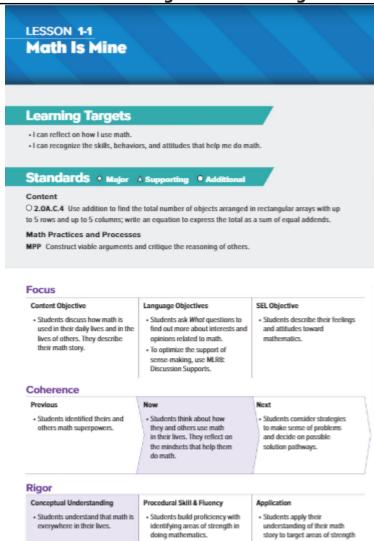

# UNIT 1 PLANNER Math Is...

LESS	ON	MATH OBJECTIVE	LANGUAGE OBJECTIVE	SOCIAL AND EMOTIONAL LEARNING OBJECTIVE	LESSON	KEY VOCABULA
Unit	Opener In The Longest	Path Explore the longest path to get	from one side of a grid to the other.			
11	Math is Mine	Students discuss how math is used in their daily lives and in the lives of others. They describe their math story.	Students ask What questions to find out more about interests and opinions related to math.  To optimize the support of sense-making, ELs will participate in MLR8: Discussion Supports.	Students describe their feelings and attitudes toward mathematics.	14	Math Terms
1-2	Math Is Exploring and Thinking	Students discuss approaches for understanding a problem and strategies for solving it. Students make sense of quantities in the problem and look for connections among quantities.	Students describe the thinking process for solving a math problem using could and might.  To optimize output, ELs will participate in MLR1: Stronger and Clearer Each Time.	Students recognize when they feel frustration during math class.	1.2	addends quantity
1-3	Math Is In My World	Students explore ways to show real-world situations and problems with mathematical models.	Students explain possible ways to solve a problem using might.  To optimize output, ELs will participate in MLR3: Critique, Correct, and Clarify.	Students show appreciation for the different perspectives of their classmates.	1-3	model
14	Math Is Explaining and Sharing	Students construct arguments to support their thinking. Students respond to the ideas and arguments of others.	Students discuss arguments to support their thinking while answering Wh- and Yes/No questions and using thinking as needed. To cultivate conversation, ELs will participate in MLR7: Compare and Connect.	Students practice showing respect for classmates as they share ideas and thinking.	1.4	estimate exact
1-5	Math Is Finding Patterns	Students explore strategies for uncovering patterns and for using patterns to solve problems.	Students talk about the usefulness of mathematical patterns using con.  To maximize linguistic and cognitive meta-awareness, ELs will participate in MLR2: Collect and Display.	Students practice self-control as they learn to take turns when sharing ideas with a partner or in a group.	1-5	combinations patterns relationships
1-6	Math Is Ours	Students discuss and decide on classroom norms of interaction for a productive math learning environment.	Students describe actions and behaviors in class using the clause When we do moth  To optimize output, ELs will participate in MLRS: Co-Craft Questions and Problems.	Students make decisions about classroom norms for working productively with classmates.	1-6	
Unit	Review					

# **Essential Questions**

See Above

# **Instructional Strategies and Learning Activities**

# LESSON 1-2 Math Is Exploring and Thinking

# **Learning Targets**

- I can show a problem in different ways.
- . I can explain different ways to think about numbers.

# Standards • Major A Supporting • Additional

#### Content

2.NBT.B.5 Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

MPP Make sense of problems and persevere in solving them.

MPP Reason abstractly and quantitatively.

#### Focus

#### Content Objectives

- Students discuss approaches for understanding a problem and strategies for solving it.
- Students build proficiency with relating quantities in a problem.

### Language Objectives

- Students describe the thinking process for solving a math problem using could and might.
- To optimize output, use MLR1: Stronger and Clearer Each Time.

#### SEL Objective

 Students recognize when they feel frustration during math class.

#### Coherence

#### Previous

 Students thought about how they and others use math in their lives. They reflected on the mindsets that help them do math.

#### Now

 Students consider strategies to make sense of problems and decide on possible solution pathways.

#### Nex

 Students explore ways to use mathematics to model real-world situations.

#### Rigor

## Conceptual Understanding

 Students demonstrate understanding of the problem solving process, with a focus on making sense of a problem and determining a solution plan.

### Procedural Skill & Fluency

 Students build proficiency with the problem solving process.

### Application

 Students apply their understanding of the problemsolving process as they solve real-world problems.

# LESSON 1-3 Math is in My World

# **Learning Targets**

- I can represent a real-world situation using mathematics.
- I can explain tools I can use to solve a problem.

# Standards • Major A Supporting • Additional

#### Content

2.NBT.A.1 Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones.

#### Math Practices and Processes

MPP Model with Mathematics.

MPP Use appropriate tools strategically.

#### Focus

#### Content Objective

 Students explore ways to show real-world situations and problems with mathematical models.

#### Language Objectives

- Students explain possible ways to solve a problem using might.
- To optimize output, use MLR3: Critique, Correct, and Clarify.

#### SEL Objective

 Students show appreciation for the different perspectives of their classmates.

#### Coherence

#### Previous

 Students considered strategies to make sense of problems and decided on possible solution pathways.

#### Now

 Students explore ways to use mathematics to model real-world situations.

#### Next

 Students consider elements of a viable mathematical argument to defend their thinking or solution.

### Rigor

# Conceptual Understanding

 Students demonstrate understanding of how real-world situations and problems can be modeled with mathematics.

# Procedural Skill & Fluency

 Students build proficiency with modeling with mathematics.

### Application

 Students apply their understanding of modeling with mathematics to model real-world problems with mathematics.

# LESSON 1-4

# **Math Is Explaining and Sharing**

# **Learning Targets**

- I can construct an argument to explain my thinking.
- . I can explain my thinking with clear and appropriate terms.

# Standards • Major • Supporting • Additional

O 2.MD.C.8 Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and

#### Math Practices and Processes

MPP Construct arguments and critique the reasoning of others.

MPP Attend to precision.

#### Focus

- · Students construct arguments to support their thinking.
- . Students respond to the ideas and arguments of others.

#### Language Objectives

- · Students discuss arguments to support their thinking while answering Wh- and Yes/No questions and using thinking as needed.
- To cultivate conversation, use MLR7: Compare and Connect.

· Students practice showing respect for classmates as they share ideas and thinking.

#### Coherence

· Students explored ways to use mathematics to model real-world

argument to defend their thinking or solution.

patterns in mathematics. They generate and extend patterns.

### Rigor

# Conceptual Understanding

· Students demonstrate understanding of what and how to critique the arguments of others.

# Procedural Skill & Fluency

 Students build proficiency with constructing arguments.

# Application

 Students apply their understanding of viable arguments to construct arguments to support their solutions and ideas.

# LESSON 1-5 Math Is Finding Patterns

# **Learning Targets**

- I can use patterns to develop efficient strategies to solve problems.
- · I can explain why patterns are useful to solve problems.

# Standards • Major A Supporting • Additional

#### Content

2.NBT.B.5 Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

MPP Look for and make use of structure.

MPP Look for and express regularity in repeated reasoning.

#### Focus

#### Content Objective

 Students explore strategies for uncovering patterns and for using patterns to solve problems.

## Language Objectives

- Students talk about the usefulness of mathematical patterns using cov.
- To maximize linguistic and cognitive meta-awareness, use MLR2: Collect and Display.

#### SEL Objective

 Students practice self-control as they learn to take turns when sharing ideas with a partner or in a group.

#### Coherence

#### Previous

 Students considered elements of a viable mathematical argument to defend their thinking or solution.

#### Now

 Students analyze the use of patterns in mathematics. They generate and extend patterns.

#### Next

 Students identify the classroom practices that lead to productive math work.

# Rigor

### Conceptual Understanding

 Students demonstrate understanding of patterns.

# Procedural Skill & Fluency

 Students build proficiency with describing and analyzing patterns.

#### Application

 Students apply their understanding of patterns to solve problems.

### LESSON 1-6 **Math Is Ours Learning Targets** . I can recognize the behaviors and mindsets that support a productive classroom learning environment. . I can identify the mindsets that help me problem solve. Standards • Major A Supporting • Additional △ 2.NBT.A.2 Count within 1000; skip-count by 5s, 10s, and 100s. Math Practices and Processes MPP Make sense of problems and persevere in solving them. MPP Construct viable arguments and critique the reasoning of others. MPP Use appropriate tools strategically. Focus Content Objective Language Objectives SEL Objective · Students discuss and decide · Students describe actions and · Students make decisions about on classroom norms of interaction for a productive behaviors in class using the classroom norms for working productively with classmates. clause When we do moth.... math learning environment. - To optimize output, use MLRS: Co-Craft Questions and Problems. # **Integration of Career Readiness, Life Literacies and Key Skills**

PFL.9.1.2. Fl.1	Differentiate the various forms of money and how they are used (e.g., coins, bills, checks, debit and credit cards).
PFL.9.1.2.CR.1	Recognize ways to volunteer in the classroom, school and community.
PFL.9.1.2.CR.2	List ways to give back, including making donations, volunteering, and starting a business.
PFL.9.1.2.FP.1	Explain how emotions influence whether a person spends or saves.
PFL.9.1.2.FP.3	Identify the factors that influence people to spend or save (e.g., commercials, family, culture, society).

PFL.9.1.2.PB.1	Determine various ways to save and places in the local community that help people save and accumulate money over time.
PFL.9.1.2.PB.2	Explain why an individual would choose to save money.
TECH.9.4.2.Cl.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
TECH.9.4.2.DC.3	Explain how to be safe online and follow safe practices when using the internet (e.g., 8.1.2.NI.3, 8.1.2.NI.4).
TECH.9.4.2.DC.6	Identify respectful and responsible ways to communicate in digital environments.
TECH.9.4.2.DC.7	Describe actions peers can take to positively impact climate change (e.g., 6.3.2.CivicsPD.1).
TECH.9.4.2.TL.2	Create a document using a word processing application.
TECH.9.4.2.TL.5	Describe the difference between real and virtual experiences.
TECH.9.4.2.TL.6	Illustrate and communicate ideas and stories using multiple digital tools (e.g., SL.2.5.).
TECH.9.4.2.TL.7	Describe the benefits of collaborating with others to complete digital tasks or develop digital artifacts (e.g., W.2.6., 8.2.2.ED.2).

# **Technology and Design Integration**

CS.K-2.8.1.2.AP.4	Break down a task into a sequence of steps.
CS.K-2.8.1.2.AP.5	Describe a program's sequence of events, goals, and expected outcomes.
CS.K-2.8.1.2.CS.1	Select and operate computing devices that perform a variety of tasks accurately and quickly based on user needs and preferences.
CS.K-2.8.1.2.DA.1	Collect and present data, including climate change data, in various visual formats.
CS.K-2.8.1.2.DA.3	Identify and describe patterns in data visualizations.
CS.K-2.8.1.2.DA.4	Make predictions based on data using charts or graphs.
CS.K-2.8.2.2.ITH.4	Identify how various tools reduce work and improve daily tasks.

# **Interdisciplinary Connections**

LA.L.3.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
LA.W.3.4	With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LA.RI.3.1	Ask and answer questions, and make relevant connections to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
LA.RI.3.2	Determine the main idea of a text; recount the key details and explain how they support the main idea.
LA.RI.3.3	Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

LA.RI.3.4	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LA.RI.3.5	Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.
LA.RI.3.6	Distinguish their own point of view from that of the author of a text.
LA.RI.3.8	Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence) to support specific points the author makes in a text.
LA.RI.3.9	Compare, contrast and reflect on (e.g., practical knowledge, historical/cultural context, and background knowledge) the most important points and key details presented in two texts on the same topic.
LA.RI.3.10	By the end of the year, read and comprehend literary nonfiction at grade level text-complexity or above, with scaffolding as needed.
LA.SL.3.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher led) with diverse partners on grade 3 topics and texts, building on others' ideas and expressing their own clearly.

# **Differentiation**

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

# • Definitions of Differentiation Components:

- o Content the specific information that is to be taught in the lesson/unit/course of instruction.
- o Process how the student will acquire the content information.
- o Product how the student will demonstrate understanding of the content.
- Learning Environment the environment where learning is taking place including physical location and/or student grouping

# Differentiation occurring in this unit:

Exit Ticket: Use Data to Inform Differentiation

Every lesson closes with an Exit Ticket. Differentiation recommendations reside in the Teacher Edition to make the Exit Ticket data actionable.

•

Refer to QSAC EXCEL SMALL SPED ACCOMMOCATIONS spreadsheet in this discipline.

# **Modifications and Accommodations used in this unit:**

# **Benchmark Assessments**

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

# **Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

# Additional Benchmarks used in this unit:

Reveal Unit assessments

# **Formative Assessments**

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

# **Formative Assessments used in this unit:**

Teacher observation

Checklists

Questioning and Discussion

Qı	uizz	zes

# **Summative Assessments**

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

# **Summative assessments for this unit:**

End of Unit assessments

# **Instructional Materials**
