

# Unit 2 Reveal Grade 3

Content Area: **Math**  
 Course(s): **Language Arts, Art**  
 Time Period: **October**  
 Length: **3 weeks**  
 Status: **Published**

## Unit Overview

### UNIT 2 PLANNER

## Use Place Value to Fluently Add and Subtract within 1,000

PACING: 18 days

LESSON	MATH OBJECTIVE	LANGUAGE OBJECTIVE	SOCIAL AND EMOTIONAL LEARNING OBJECTIVE	LESSON	KEY VOCABULARY
<b>Unit Opener</b> Penny Estimation Students use strategies to estimate the number of pennies that will fit in a rectangular region.					
2-1	<b>Represent 4-Digit Numbers</b> Students represent 4-digit numbers in expanded form, word form, and standard form using an understanding of place value.	Students describe 4-digit numbers using place value.	Students identify and discuss the emotions experienced during math learning.	2-1	Math Terms expanded form standard form word form
2-2	<b>Round Multi-Digit Numbers</b> Students round numbers to the nearest 10 or nearest 100.	Students will use the superlative nearest to explain rounding numbers.	Students collaborate with peers to complete a mathematical task and offer constructive feedback to the mathematical ideas posed by others.	2-2	round
<b>Math Probe</b> Rounding Numbers Gather data on students' understandings of rounding to the nearest 10 and nearest 100.					
2-3	<b>Estimate Sums and Differences</b> Students use compatible numbers to estimate a sum or difference.	Students make numerical estimations using about.	Students recognize and work to understand the emotions of others and practice empathetic responses.	2-3	estimate compatible number
2-4	<b>Use Addition Properties to Add</b> Students apply the properties of addition when adding two or more addends.	Students justify multiple ways to solve an addition problem using <i>and the sum will be the same</i> .	Students employ techniques that can be used to help maintain focus and manage reactions to potentially frustrating situations.	2-4	addend
2-5	<b>Addition Patterns</b> Students identify addition patterns and use the patterns to help determine sums of 3-digit numbers and check their accuracy.	Students read conditional sentences with <i>when</i> that express patterns.	Students develop and execute a plan, including selecting tools for mathematical problem solving.	2-5	even number odd number
2-6	<b>Use Partial Sums to Add</b> Students use partial sums to add 3-digit numbers.	Students use <i>can</i> to explain the steps of an addition strategy.	Students recognize personal strengths through thoughtful self-reflection.	2-6	decompose partial sum
2-7	<b>Decompose to Subtract</b> Students decompose one number in different ways to subtract.	Students compare ways to decompose a number using terms such as <i>one way and another</i> .	Students identify a problem, use creativity to execute problem-solving steps, and identify multiple solutions.	2-7	decompose
2-8	<b>Adjust Numbers to Add or Subtract</b> Students adjust numbers to help them add or subtract.	Students express an opinion with support using language such as <i>I think and because</i> .	Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.	2-8	difference sum
2-9	<b>Use Addition to Subtract</b> Students use related addition equations to find the difference.	Students describe a bar diagram using precise measurements for distance.	Students recognize and work to understand the emotions of others and practice empathetic responses.	2-9	bar diagram
2-10	<b>Fluently Add within 1,000</b> Students explain different strategies to add 3-digit numbers.	Students use the transitional word <i>then</i> to articulate a strategy with more than one step.	Students demonstrate self-awareness of personal strengths and areas of challenge in mathematics.	2-10	partial sum
2-11	<b>Fluently Subtract within 1,000</b> Students explain different strategies to subtract 3-digit numbers.	Students use command verbs to explain the steps of a strategy.	Students set a focused mathematical goal and make a plan for achieving that goal.	2-11	decompose
2-12	<b>Solve Two-Step Problems Involving Addition and Subtraction</b> Students write and solve equations to represent a two-step problem. Students use letters for the unknowns.	Students describe the amount they need to find in a word problem using the verb <i>need</i> .	Students reflect on and describe the logic and reasoning used to make a mathematical decision or conclusion.	2-12	bar diagram unknown
<b>Unit Review</b>					
<b>Fluency Practice</b>					
<b>Performance Task</b>					
<b>Unit Assessment</b>					

31A Unit 2 • Use Place Value to Fluently Add and Subtract within 1,000

## Enduring Understandings

See Above

## Essential Questions

See Above

## Instructional Strategies and Learning Activities

### LESSON 2-1

## Represent 4-Digit Numbers

### Learning Targets

- I can represent 4-digit numbers in different ways.
- I can explain how to represent 4-digit numbers in different ways.

### Standards

◆ Major ▲ Supporting ● Additional

**Content**

- 3.NBT.A.1 Use place value understanding to round whole numbers to the nearest 10 or 100.

**Math Practices and Processes**

**MPP** Look for and make use of structure.

**MPP** Look for and express regularity in repeated reasoning.

### Focus

Content Objective	Language Objectives	SEL Objective
<ul style="list-style-type: none"><li>• Students represent 4-digit numbers in expanded form, word form, and standard form using an understanding of place value.</li></ul>	<ul style="list-style-type: none"><li>• Students describe 4-digit numbers using place value.</li><li>• To maximize linguistic and cognitive meta-awareness, use MLR8: Discussion Supports.</li></ul>	<ul style="list-style-type: none"><li>• Students identify and discuss the emotions experienced during math learning.</li></ul>

### Coherence

Previous	Now	Next
<ul style="list-style-type: none"><li>• Students learned that digits in each place represent amounts of hundreds, tens, and ones (Grade 2).</li></ul>	<ul style="list-style-type: none"><li>• Students extend their understanding of place value through thousands.</li></ul>	<ul style="list-style-type: none"><li>• Students use their understanding of place value to round numbers (Unit 2).</li><li>• Students use place value to compare multi-digit numbers (Grade 4).</li></ul>

### Rigor

Conceptual Understanding	Procedural Skill & Fluency	Application
<ul style="list-style-type: none"><li>• Students understand that numbers have a predictable and generalizable structure, which extends their understanding of place value to 4-digit numbers.</li></ul>	<ul style="list-style-type: none"><li>• Students build proficiency with place value through different representations.</li></ul> <p><i>Procedural skill and fluency is not a targeted element of rigor for this standard.</i></p>	<ul style="list-style-type: none"><li>• Students apply their understanding of place value to solve problems.</li></ul> <p><i>Application is not a targeted element of rigor for this standard.</i></p>

33A Unit 2 • Use Place Value to Fluently Add and Subtract within 1,000

## LESSON 2-2

# Round Multi-Digit Numbers

### Learning Targets

- I can round numbers to the nearest 10 and 100.
- I can explain how to round numbers to the nearest 10 and 100.

### Standards

Major Supporting Additional

#### Content

- **3.NBT.A.1** Use place value understanding to round whole numbers to the nearest 10 or 100.

#### Math Practices and Processes

**MPP** Model with mathematics.

**MPP** Use appropriate tools strategically.

### Focus

#### Content Objective

- Students round numbers to the nearest 10 or nearest 100.

#### Language Objectives

- Students use the superlative *nearest* to explain rounding numbers.
- To optimize output, use MLR2: Compare and Connect.

#### SEL Objective

- Students collaborate with peers to complete a mathematical task and offer constructive feedback to the mathematical ideas posed by others.

### Coherence

#### Previous

- Students gained an understanding of place value of 3-digit numbers (Grade 2).

#### Now

- Students use their understanding of place value to round 3-digit numbers to the nearest 10 or 100.

#### Next

- Students use rounded numbers to estimate sums and differences (Unit 2).
- Students round multi-digit numbers to any place (Grade 4).

### Rigor

#### Conceptual Understanding

- Students develop an understanding of rounding using a number line and place value.

#### Procedural Skill & Fluency

- Students develop proficiency with rounding 3-digit numbers to the nearest 10 or 100.

*Procedural skill and fluency is not a targeted element of rigor for this standard.*

#### Application

- Students apply their understanding of rounding numbers to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

## LESSON 2-3

# Estimate Sums and Differences

### Learning Targets

- I can use compatible numbers to estimate sums and differences.
- I can explain how to use compatible numbers to estimate sums and differences.

### Standards

Major

Supporting

Additional

#### Content

- **3.NBT.A.1** Use place value understanding to round whole numbers to the nearest 10 or 100.
- **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

- MPP** Use appropriate tools strategically.
- MPP** Look for and make use of structure.

### Focus

#### Content Objective

- Students use compatible numbers to estimate a sum or difference.

#### Language Objectives

- Students make numerical estimations using about.
- To cultivate conversation, use MLR3: Critique, Correct, and Clarify.

#### SEL Objective

- Students recognize and work to understand the emotions of others and practice empathetic responses.

### Coherence

#### Previous

- Students learned how to make a good estimate (Grade 2).
- Students rounded numbers to the nearest 10 and 100 (Unit 2).

#### Now

- Students use their knowledge of rounding to the nearest 10 and 100 to estimate sums and differences.

#### Next

- Students break apart numbers to add and subtract 3-digit numbers (Unit 2).
- Students use the standard algorithm to add and subtract multi-digit numbers (Grade 4).

### Rigor

#### Conceptual Understanding

- Students develop an understanding of compatible numbers to estimate sums and differences.

*Conceptual understanding is not a targeted element of rigor for this standard.*

#### Procedural Skill & Fluency

- Students build proficiency with estimating sums and differences.

#### Application

- Students apply an understanding of estimation to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

## Use Addition Properties to Add

## Learning Targets

- I can apply addition properties as strategies to help add more efficiently.
- I can explain how to apply addition properties as strategies to help add more efficiently.

## Standards • Major ▲ Supporting ● Additional

## Content

- **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

## Math Practices and Processes

**MPP** Look for and make use of structure.

**MPP** Look for and express regularity in repeated reasoning.

## Focus

## Content Objective

- Students apply the properties of addition when adding two or more addends.

## Language Objectives

- Students justify multiple ways to solve an addition problem using *and the sum will be the same*.
- To optimize output, use in MLRT: Stronger and Clearer Each Time.

## SEL Objective

- Students employ techniques that can be used to help maintain focus and manage reactions to potentially frustrating situations.

## Coherence

## Previous

- Students used place value understanding and properties of operations to add and subtract (Grade 2).

## Now

- Students explore addition properties by grouping addends or changing the order of addends to add more efficiently.

## Next

- Students add and subtract 3 digit numbers using strategies based on place value and properties of operations (Unit 2).
- Students fluently add multi digit whole numbers using properties of addition (Grade 4).

## Rigor

## Conceptual Understanding

- Students build their understanding of addition properties to add multi digit numbers.

*Conceptual understanding is not a targeted element of rigor for this standard.*

## Procedural Skill &amp; Fluency

- Students develop proficiency with addition strategies by using addition properties to add multi digit numbers.

## Application

- Students apply their understanding of addition properties to solve real world problems.

*Application is not a targeted element of rigor for this standard.*

## Learning Targets

- I can use addition patterns to help find a sum.
- I can explain how to use addition patterns to help find a sum.

## Standards • Major ▲ Supporting ● Additional

## Content

◇ **3.OA.D.9** Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.

## Math Practices and Processes

**MPP** Look for and express regularity in repeated reasoning.

## Focus

## Content Objective

- Students identify addition patterns and use the patterns to help determine sums of 3-digit numbers and check their accuracy.

## Language Objectives

- Students read conditional sentences with *when* that express patterns.
- To maximize linguistic and cognitive meta-awareness, use **MLR2: Collect and Display**.

## SEL Objective

- Students develop and execute a plan, including selecting tools for mathematical problem solving.

## Coherence

## Previous

- Students identified numbers (1–20) as even or odd and learned the sum of two even addends is always even (Grade 2).

## Now

- Students build an understanding of addition patterns and use the patterns to help determine whether a sum is accurate.

## Next

- Students add and subtract 3-digit numbers using strategies based on place value and properties of operations (Unit 2).
- Students fluently add multi-digit whole numbers using properties of addition (Grade 4).

## Rigor

## Conceptual Understanding

- Students strengthen their understanding of addition patterns to solve addition problems efficiently.

## Procedural Skill &amp; Fluency

- Students build proficiency with solving problems by identifying and using addition patterns.
- Procedural skill and fluency is not a targeted element of rigor for this standard.*

## Application

- Students apply their understanding of addition patterns to solve real-world problems.
- Application is not a targeted element of rigor for this standard.*

## LESSON 2-6

# Use Partial Sums to Add

### Learning Targets

- I can use horizontal and vertical formats to add partial sums.
- I can explain how to use horizontal and vertical formats to add partial sums.

### Standards • Major ▲ Supporting ● Additional

#### Content

○ **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

**MPP** Construct viable arguments and critique the reasoning of others.

### Focus

#### Content Objective

- Students use partial sums to add 3-digit numbers.

#### Language Objectives

- Students use *can* to explain the steps of an addition strategy.
- To cultivate conversation, use **MLRF**: Compare and Connect.

#### SEL Objective

- Students recognize personal strengths through thoughtful self-reflection.

### Coherence

#### Previous

- Students used partial sums to find the sum of two 2-digit numbers (Grade 2).

#### Now

- Students use partial sums to determine the sum of two 3-digit numbers.

#### Next

- Students add two 3-digit numbers by adjusting numbers (Unit 2).
- Students use the standard algorithm to add multi-digit numbers (Grade 4).

### Rigor

#### Conceptual Understanding

- Students deepen their understanding of addition as they use partial sums to add 3-digit numbers.

*Conceptual understanding is not a targeted element of rigor for this standard.*

#### Procedural Skill & Fluency

- Students gain fluency with addition as they use partial sums to add two 3-digit numbers.

#### Application

- Students apply their understanding of partial sums to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

# Decompose to Subtract

## Learning Targets

- I can decompose a number in different ways to help subtract.
- I can explain how to decompose a number in different ways to help subtract.

## Standards • Major ▲ Supporting ● Additional

### Content

○ **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

### Math Practices and Processes

**MPP** Construct viable arguments and critique the reasoning of others.

**MPP** Reason abstractly and quantitatively.

## Focus

Content Objective	Language Objectives	SEL Objective
<ul style="list-style-type: none"> <li>• Students decompose one number in different ways to subtract.</li> </ul>	<ul style="list-style-type: none"> <li>• Students compare ways to decompose a number using terms such as <i>one way, another</i>.</li> <li>• To cultivate conversation, use MLRS: Co-Craft Problems.</li> </ul>	<ul style="list-style-type: none"> <li>• Students identify a problem, use creativity to execute problem-solving steps, and identify multiple solutions.</li> </ul>

## Coherence

Previous	Now	Next
<ul style="list-style-type: none"> <li>• Students used strategies to subtract 2 digit numbers (Grade 2).</li> <li>• Students used rounding to estimate differences (Unit 2).</li> </ul>	<ul style="list-style-type: none"> <li>• Students learn how decomposing a number can help find the difference of two 3-digit numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students subtract 3-digit numbers by adjusting numbers (Unit 2).</li> <li>• Students use the standard algorithm to subtract multi-digit numbers (Grade 4).</li> </ul>

## Rigor

Conceptual Understanding	Procedural Skill & Fluency	Application
<ul style="list-style-type: none"> <li>• Students deepen their understanding of subtraction by decomposing a number to find the difference.</li> </ul> <p><i>Conceptual understanding is not a targeted element of rigor for this standard.</i></p>	<ul style="list-style-type: none"> <li>• Students gain fluency with subtraction as they decompose a number to subtract two 3-digit numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students apply their understanding of decomposing to solve real-world subtraction problems.</li> </ul> <p><i>Application is not a targeted element of rigor for this standard.</i></p>

## LESSON 2-8

# Adjust Numbers to Add or Subtract

### Learning Targets

- I can adjust numbers to make it easier to add or subtract two 3-digit numbers.
- I can explain how to adjust numbers to make it easier to add or subtract two 3-digit numbers.

### Standards • Major ▲ Supporting • Additional

#### Content

○ **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

**MPP** Use appropriate tools strategically.

**MPP** Look for and make use of structure.

### Focus

Content Objective	Language Objectives	SEL Objective
<ul style="list-style-type: none"> <li>• Students adjust numbers to help them add or subtract.</li> </ul>	<ul style="list-style-type: none"> <li>• Students express an opinion with support using language such as <i>I think and because</i>.</li> <li>• To optimize output and cultivate conversation, ELs will participate in MLRA: Information Gap.</li> </ul>	<ul style="list-style-type: none"> <li>• Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.</li> </ul>

### Coherence

Previous	Now	Next
<ul style="list-style-type: none"> <li>• Students added and subtracted using strategies based on place value (Grade 2).</li> <li>• Students decomposed numbers to help add and subtract (Unit 2).</li> </ul>	<ul style="list-style-type: none"> <li>• Students add or subtract two 3-digit numbers by adjusting the numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students fluently add and subtract within 1,000 (Unit 2).</li> <li>• Students add and subtract multi-digit numbers using the standard algorithm (Grade 4).</li> </ul>

<ul style="list-style-type: none"> <li>• Students understand that adjusting numbers can make it easier to add or subtract.</li> </ul> <p><i>Conceptual understanding is not a targeted element of rigor for this standard.</i></p>	<ul style="list-style-type: none"> <li>• Students build proficiency with addition and subtraction by using the strategy of adjusting numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students apply their understanding of adjusting numbers to solve real-world problems.</li> </ul> <p><i>Application is not a targeted element of rigor for this standard.</i></p>

## LESSON 2-9

# Use Addition to Subtract

### Learning Targets

- I can show how addition and subtraction are related.
- I can explain how addition and subtraction are related.

### Standards

Major Supporting Additional

#### Content

- **3.NBT.A.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

#### Math Practices and Processes

- MPP** Reason abstractly and quantitatively.
- MPP** Look for and make use of structure.

### Focus

#### Content Objective

- Students use related addition equations to find the difference.

#### Language Objectives

- Students describe a bar diagram using precise measurements for distance: miles.
- To support sense-making, use MLR6: Three Reads.

#### SEL Objective

- Students recognize and work to understand the emotions of others and practice empathetic responses.

### Coherence

#### Previous

- Students explored the relationship between addition and subtraction with 2-digit numbers (Grade 2).
- Students explored addition patterns (Unit 2).

#### Now

- Students extend their understanding of the relationship between addition and subtraction to 3-digit numbers.

#### Next

- Students explore the relationship between multiplication and division (Unit 3).
- Students fluently add and subtract multi-digit whole numbers using the standard algorithm (Grade 4).

### Rigor

#### Conceptual Understanding

- Students understand that they can solve a subtraction equation using a related addition equation.

*Conceptual understanding is not a targeted element of rigor for this standard.*

#### Procedural Skill & Fluency

- Students build proficiency rewriting a subtraction equation as a related addition equation.

#### Application

- Students apply their understanding of the relationship between addition and subtraction to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

## Learning Targets

- I can use different strategies to add 3-digit numbers.
- I can explain how to use different strategies to add 3-digit numbers.

## Standards • Major ▲ Supporting ● Additional

### Content

○ **3.NBT.A.2** Fluently add and subtract within 1,000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

### Math Practices and Processes

**MPP** Make sense of problems and persevere in solving them.

**MPP** Look for and make use of structure.

## Focus

### Content Objective

- Students explain different strategies to add 3-digit numbers.

### Language Objectives

- Students use the transitional word *then* to articulate a strategy with more than one step.
- To optimize output, use MLRS: Co-Craft Problems.

### SEL Objective

- Students demonstrate self-awareness of personal strengths and areas of challenge in mathematics.

## Coherence

### Previous

- Students used addition strategies to add 2-digit numbers (Grade 2).
- Students explored addition strategies to add 3-digit numbers (Unit 2).

### Now

- Students fluently add 3-digit numbers by using different addition strategies.

### Next

- Students add two 3-digit numbers in two-step word problems (Unit 2).
- Students fluently add multi-digit whole numbers using the standard algorithm (Grade 4).

## Rigor

### Conceptual Understanding

- Students build upon their understanding of addition strategies to decide which strategy is most efficient.

*Conceptual understanding is not a targeted element of rigor for this standard.*

### Procedural Skill & Fluency

- Students build fluency with 3-digit addition by using different addition strategies.

### Application

- Students apply their understanding of addition strategies to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

## Learning Targets

- I can use different strategies to subtract two 3-digit numbers.
- I can explain how to use different strategies to subtract two 3-digit numbers.

## Standards • Major ▲ Supporting ◆ Additional

## Content

○ **3.NBT.A.2** Fluently add and subtract within 1,000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

## Math Practices and Processes

**MPP** Make sense of problems and persevere in solving them.

**MPP** Look for and express regularity in repeated reasoning.

## Focus

Content Objective	Language Objectives	SEL Objective
<ul style="list-style-type: none"> <li>• Students explain different strategies to subtract 3-digit numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students use command verbs to explain the steps of a strategy.</li> <li>• To support sense-making, use <b>MLR8: Discussion Supports</b>.</li> </ul>	<ul style="list-style-type: none"> <li>• Students set a focused mathematical goal and make a plan for achieving that goal.</li> </ul>

## Coherence

<ul style="list-style-type: none"> <li>• Students used different strategies to subtract 2-digit numbers (Grade 2).</li> <li>• Students used different strategies to subtract 3-digit numbers (Unit 2).</li> </ul>	<ul style="list-style-type: none"> <li>• Students extend their understanding of subtraction strategies to choose the best strategy when subtracting two 3-digit numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students fluently add and subtract multi-digit whole numbers using the standard algorithm (Grade 4).</li> </ul>

## Rigor

Conceptual Understanding	Procedural Skill & Fluency	Application
<ul style="list-style-type: none"> <li>• Students build on their understanding of subtraction strategies to subtract two 3-digit numbers.</li> </ul> <p><i>Conceptual understanding is not a targeted element of rigor for this standard.</i></p>	<ul style="list-style-type: none"> <li>• Students build proficiency in using different strategies to subtract two 3-digit numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Students apply their understanding of subtraction to solve problems in a real-world context.</li> </ul> <p><i>Application is not a targeted element of rigor for this standard.</i></p>

## LESSON 2-12

# Solve Two-Step Problems Involving Addition and Subtraction

### Learning Targets

- I can solve problems that have more than one step.
- I can explain how to solve problems that have more than one step.

### Standards • Major ▲ Supporting ♦ Additional

#### Content

◊ **3.OA.D.8** Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

#### Math Practices and Processes

**MPP** Make sense of problems and persevere in solving them.

**MPP** Model with mathematics.

### Focus

#### Content Objectives

- Students write and solve equations to represent a two-step word problem.
- Students use letters for the unknowns.

#### Language Objectives

- Students describe the amount they need to find in a word problem using the verb *need*.
- To maximize linguistic and cognitive meta-awareness, use MLR2: Collect and Display.

#### SEL Objective

- Students reflect on and describe the logic and reasoning used to make a mathematical decision or conclusion.

### Coherence

#### Previous

- Students solved word problems involving addition and subtraction (Grade 2).
- Students added and subtracted 3-digit numbers (Unit 2).

#### Now

- Students apply their understanding of adding and subtracting 3-digit numbers to solve two-step problems using addition and subtraction.

#### Next

- Students use addition and subtraction to solve word problems involving perimeter (Unit 11).
- Students fluently add and subtract multi-digit whole numbers using the standard algorithm (Grade 4).

### Rigor

#### Conceptual Understanding

- Students use their understanding of representations to solve word problems involving addition and subtraction of 3-digit numbers.

#### Procedural Skill & Fluency

- Students build proficiency with adding and subtracting 3-digit numbers as they solve two-step problems.

*Procedural skill and fluency is not a targeted element of rigor for this standard.*

#### Application

- Students apply their understanding of addition and subtraction to solve real-world problems that involve more than one step.

## Integration of Career Readiness, Life Literacies and Key Skills

PFL.9.1.2. FI.1

Differentiate the various forms of money and how they are used (e.g., coins, bills, checks, debit and credit cards).

PFL.9.1.2.CR.1

Recognize ways to volunteer in the classroom, school and community.

PFL.9.1.2.CR.2

List ways to give back, including making donations, volunteering, and starting a business.

PFL.9.1.2.FP.1

Explain how emotions influence whether a person spends or saves.

PFL.9.1.2.FP.3

Identify the factors that influence people to spend or save (e.g., commercials, family, culture, society).

PFL.9.1.2.PB.1	Determine various ways to save and places in the local community that help people save and accumulate money over time.
PFL.9.1.2.PB.2	Explain why an individual would choose to save money.
TECH.9.4.2.CI.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
TECH.9.4.2.DC.3	Explain how to be safe online and follow safe practices when using the internet (e.g., 8.1.2.NI.3, 8.1.2.NI.4).
TECH.9.4.2.DC.6	Identify respectful and responsible ways to communicate in digital environments.
TECH.9.4.2.DC.7	Describe actions peers can take to positively impact climate change (e.g., 6.3.2.CivicsPD.1).
TECH.9.4.2.TL.2	Create a document using a word processing application.
TECH.9.4.2.TL.5	Describe the difference between real and virtual experiences.
TECH.9.4.2.TL.6	Illustrate and communicate ideas and stories using multiple digital tools (e.g., SL.2.5.).
TECH.9.4.2.TL.7	Describe the benefits of collaborating with others to complete digital tasks or develop digital artifacts (e.g., W.2.6., 8.2.2.ED.2).

## Technology and Design Integration

---

CS.K-2.8.1.2.AP.4	Break down a task into a sequence of steps.
CS.K-2.8.1.2.AP.5	Describe a program's sequence of events, goals, and expected outcomes.
CS.K-2.8.1.2.CS.1	Select and operate computing devices that perform a variety of tasks accurately and quickly based on user needs and preferences.
CS.K-2.8.1.2.DA.1	Collect and present data, including climate change data, in various visual formats.
CS.K-2.8.1.2.DA.3	Identify and describe patterns in data visualizations.
CS.K-2.8.1.2.DA.4	Make predictions based on data using charts or graphs.
CS.K-2.8.2.2.ITH.4	Identify how various tools reduce work and improve daily tasks.

## Interdisciplinary Connections

---

LA.L.3.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
LA.W.3.4	With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LA.RI.3.1	Ask and answer questions, and make relevant connections to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
LA.RI.3.2	Determine the main idea of a text; recount the key details and explain how they support the main idea.
LA.RI.3.3	Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

LA.RI.3.4	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LA.RI.3.5	Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.
LA.RI.3.6	Distinguish their own point of view from that of the author of a text.
LA.RI.3.8	Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence) to support specific points the author makes in a text.
LA.RI.3.9	Compare, contrast and reflect on (e.g., practical knowledge, historical/cultural context, and background knowledge) the most important points and key details presented in two texts on the same topic.
LA.RI.3.10	By the end of the year, read and comprehend literary nonfiction at grade level text-complexity or above, with scaffolding as needed.
LA.SL.3.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher led) with diverse partners on grade 3 topics and texts, building on others' ideas and expressing their own clearly.

## **Differentiation**

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

#### Exit Ticket: Use Data to Inform Differentiation

Every lesson closes with an Exit Ticket. Differentiation recommendations reside in the Teacher Edition to make the Exit Ticket data actionable.

## **Modifications and Accommodations**

---

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

**Modifications and Accommodations used in this unit:**

**Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

**Schoolwide Benchmark assessments:**

Aimswest benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

**Additional Benchmarks used in this unit:**

Reveal Unit assessments

**Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

**Formative Assessments used in this unit:**

Teacher observation

Checklists

Questioning and Discussion

## **Summative Assessments**

---

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

## **Instructional Materials**

---

See above

## **Standards**

---

MA.3.OA.D	Solve problems involving the four operations, and identify and explain patterns in arithmetic.
MA.3.OA.D.8	Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.
MA.3.OA.D.9	Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations.
MA.3.NBT.A	Use place value understanding and properties of operations to perform multi-digit arithmetic.
MA.3.NBT.A.1	Use place value understanding to round whole numbers to the nearest 10 or 100.
MA.3.NBT.A.2	Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
