

# Unit 5 Reveal Grade 4

Content Area: **Math**  
 Course(s): **Math**  
 Time Period: **December**  
 Length: **2 weeks**  
 Status: **Published**

## Unit Overview

### UNIT 5 PLANNER

## Numbers and Number Patterns

PACING: 10 days

LESSON	MATH OBJECTIVE	LANGUAGE OBJECTIVE	SOCIAL AND EMOTIONAL LEARNING OBJECTIVE	LESSON	KEY VOCABULARY
<b>Unit Opener</b> <i>What's in a Spiral</i> Explore number patterns using spirals, rectangles, and the Fibonacci sequence.					
<b>5-1</b>	<b>Understand Factors of a Number</b> Students use their understanding of multiplication to determine all factor pairs of a whole number.	Students name all the factor pairs of a whole number using the modal <i>con</i> .	Students recognize personal strengths through thoughtful self-reflection.	<b>5-1</b>	Math Terms factor factor pairs
<b>Math Probe</b> <i>Factors</i> Gather data on students' understandings of finding factors of a number.					
<b>5-2</b>	<b>Understand Prime and Composite Numbers</b> Students identify a whole number as prime or composite based on the number of factor pairs it has.	Students describe the process of identifying a whole number as prime or composite using the active and passive voice.	Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.	<b>5-2</b>	composite number factor pairs prime number
<b>5-3</b>	<b>Understand Multiples</b> Students determine whether a whole number is a multiple of a given number.	Students discuss whether a whole number is a multiple of a given number using modals of possibility.	Students exchange ideas for mathematical problem-solving with a peer, listening attentively and providing thoughtful and constructive feedback.	<b>5-3</b>	factor multiple product
<b>5-4</b>	<b>Number or Shape Patterns</b> Students recognize, extend, and describe a number or shape pattern.	Students explain how to find a number or shape pattern using the target language <i>repeat and grow</i> .	Students demonstrate thoughtful reflection through identifying the causes of challenges and successes while completing a mathematical task.	<b>5-4</b>	pattern pattern rule sequence
<b>5-5</b>	<b>Generate a Pattern</b> Students generate a number or shape pattern from a given rule.	Students articulate how to generate a number or shape pattern using present tense verbs.	Students develop and execute a plan, including selecting tools for mathematical problem solving.	<b>5-5</b>	pattern rule term
<b>5-6</b>	<b>Analyze Features of a Pattern</b> Students identify and explain features of a number or shape pattern.	Students discuss features of a number or shape pattern using descriptive adjectives, including <i>striped, solid, and checkered</i> .	Students reflect on and describe the logic and reasoning used to make a mathematical decision or conclusion.	<b>5-6</b>	pattern rule sequence term
<b>Unit Review</b>					
<b>Fluency Practice</b>					
<b>Unit Assessment</b>					
<b>Performance Task</b>					

## Enduring Understandings

## Essential Questions

See Above

## Instructional Strategies and Learning Activities

### LESSON 5-1

## Understand Factors of a Number

### Learning Targets

- I can multiplicatively decompose a number into two factors, called factor pairs.
- I can explain how to find all factor pairs of a number.

### Standards

Major Supporting Additional

#### Content

△ **4.OA.B.4** Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

#### Math Practices and Processes

**MPP** Model with mathematics.

### Focus

#### Content Objective

- Students use their understanding of multiplication to determine all the factor pairs of a whole number.

#### Language Objectives

- Students name all the factor pairs of a whole number using the modal *can*.
- To support sense making and maximize meta-awareness, ELs participate in MLR 8: Discussion Supports and MLR 6: Three Reads.

#### SEL Objective

- Students recognize personal strengths through thoughtful self-reflection.

### Coherence

#### Previous

- Students fluently multiplied and divided within 100 (Grade 3).
- Students solved multiplicative comparison problems using multiplication and division (Unit 4).

#### Now

- Students determine all the factor pairs of a whole number.

#### Next

- Students multiply a multi-digit number by a one-digit number using place value and properties of operations (Unit 6).
- Students find the greatest common factor of two whole numbers (Grade 6).

### Rigor

#### Conceptual Understanding

- Students extend their understanding of multiplication to decompose a number into pairs of factors.
- Conceptual understanding is not a targeted element of rigor for this standard.*

#### Procedural Skill & Fluency

- Students develop proficiency in finding all factor pairs of a number.

#### Application

- Students apply their knowledge of factor pairs to solve real-world problems.

*Application is not a targeted element of rigor for this standard.*

## LESSON 5-2

# Understand Prime and Composite Numbers

### Learning Target

- I can identify a whole number as prime or composite based on the number of factor pairs it has.

### Standards

Major Supporting Additional

#### Content

△ **4.OA.B** Gain familiarity with factors and multiples.

△ **4.OA.B.4** Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

#### Math Practices and Processes

**MPP** Look for and make use of structure.

### Focus

#### Content Objective

- Students identify a whole number as prime or composite based on the number of factor pairs it has.

#### Language Objectives

- Students describe the process of identifying a whole number as prime or composite using the active and passive voice.
- To optimize output, ELs participate in MLR7: Compare and Connect.

#### SEL Objective

- Students collaborate with peers and contribute to group effort to achieve a collective mathematical goal.

### Coherence

#### Previous

- Students learned how to fluently multiply and divide within 100 (Grade 3).
- Students learned how to find all the factor pairs of a whole number (Unit 5).

#### Now

- Students use their understanding of factor pairs to identify a number as prime or composite.

#### Next

- Students find multiples of whole numbers (Unit 5).
- Students find the greatest common factor and least common multiple of two whole numbers (Grade 6).

### Rigor

#### Conceptual Understanding

- Students use their knowledge of factor pairs to develop an understanding of prime and composite numbers.

#### Procedural Skill & Fluency

- Students develop proficiency with identifying whole numbers as prime or composite.
- Procedural skill and fluency is not a targeted element of rigor for this standard.*

#### Application

- Students apply their knowledge of prime and composite numbers to solve real-world problems.
- Application is not a targeted element of rigor for this standard.*

## LESSON 5-3

# Understand Multiples

### Learning Target

- I can find multiples of a whole number in the range 1–100.

### Standards

Major Supporting Additional

#### Content

△ **4.OA.B** Gain familiarity with factors and multiples.

△ **4.OA.B.4** Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

#### Math Practices and Processes

**MPP** Look for and express regularity in repeated reasoning.

### Focus

#### Content Objective

- Students determine whether a whole number is a multiple of a given number.

#### Language Objectives

- Students discuss whether a whole number is a multiple of a given number using models of possibility.
- To support sense-making and cultivate conversation, ELs participate in MLR2: Collect and Display and MLR7: Compare and Connect.

#### SEL Objective

- Students exchange ideas for mathematical problem-solving with a peer, listening attentively and providing thoughtful and constructive feedback.

### Coherence

#### Previous

- Students represented multiplication as equal groups (Grade 3).
- Students decomposed numbers into factors and factor pairs (Unit 5).

#### Now

- Students apply their understanding of multiplication to find multiples of numbers.
- Students identify the relationship between a number and the multiples of its factors.

#### Next

- Students multiply numbers by multiples of 10, 100, and 1,000 (Unit 6).
- Students apply their understanding of multiplication to multiply and divide fractions (Grade 5).

### Rigor

#### Conceptual Understanding

- Students extend their understanding multiplication to determine the multiples of a number.

#### Procedural Skill & Fluency

- Students develop proficiency with finding multiples of whole numbers.
- Procedural skill and fluency is not a targeted element of rigor for this standard.*

#### Application

- Students apply their understanding of multiples to solve problems with real-world contexts involving factors and multiples.
- Application is not a targeted element of rigor for this standard.*

## LESSON 5-4

# Number or Shape Patterns

### Learning Target

- I can recognize, extend, and describe a number or shape pattern.

### Standards • Major • Supporting • Additional

#### Content

- **4.OA.C** Generate and analyze patterns.
- **4.OA.C.5** Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. *For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.*

#### Math Practices and Processes

- MPP** Look for and make use of structure.

### Focus

#### Content Objective

- Students recognize, extend, and describe a number or shape pattern.

#### Language Objectives

- Students explain how to find a number or shape pattern using the target language *repeat and grow*.
- To maximize meta-awareness, ELs participate in MLR 5: Co-Craft Problems.

#### SEL Objective

- Students demonstrate thoughtful reflection through identifying the causes of challenges and successes while completing a mathematical task.

### Coherence

#### Previous

- Students identified and explained arithmetic patterns (Grade 3).
- Students determined similarities in groups of numbers (Unit 5).

#### Now

- Students recognize and describe number or shape patterns.
- Students extend number or shape patterns based on a pattern rule.

#### Next

- Students generate a pattern from a pattern rule (Unit 5).
- Students generate numerical patterns from two rules and identify relationships between corresponding terms (Grade 5).

### Rigor

#### Conceptual Understanding

- Students reason about shape and number patterns to identify a pattern rule.

#### Procedural Skill & Fluency

- Students use a pattern rule to extend a pattern.

#### Application

- Students analyze number and shape patterns in a real-world context.
- Application is not a targeted element of rigor for this standard.*

# Generate a Pattern

## Learning Target

- I can generate a number or shape pattern from a given rule.

## Standards

Major Supporting Additional

### Content

- 4.OA.C** Generate and analyze patterns.
- 4.OA.C.5** Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.

### Math Practices and Processes

- MPP** Look for and express regularity in repeated reasoning.

## Focus

Content Objective	Language Objectives	SEL Objective
<ul style="list-style-type: none"> <li>Students generate a number or shape pattern from a given rule.</li> </ul>	<ul style="list-style-type: none"> <li>Students articulate how to generate a number or shape pattern using present tense verbs.</li> <li>To support sense making, ELs participate in MLR 8: Discussion Supports and MLRF: Three Reads.</li> </ul>	<ul style="list-style-type: none"> <li>Students develop and execute a plan, including selecting tools for mathematical problem solving.</li> </ul>

## Integration of Career Readiness, Life Literacies and Key Skills

PFL.9.1.2.CR.1	Recognize ways to volunteer in the classroom, school and community.
PFL.9.1.2.CR.2	List ways to give back, including making donations, volunteering, and starting a business.
PFL.9.1.2. FI.1	Differentiate the various forms of money and how they are used (e.g., coins, bills, checks, debit and credit cards).
PFL.9.1.2.FP.1	Explain how emotions influence whether a person spends or saves.
PFL.9.1.2.FP.3	Identify the factors that influence people to spend or save (e.g., commercials, family, culture, society).

PFL.9.1.2.PB.1	Determine various ways to save and places in the local community that help people save and accumulate money over time.
PFL.9.1.2.PB.2	Explain why an individual would choose to save money.
TECH.9.4.2.CI.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.2	Identify possible approaches and resources to execute a plan (e.g., 1.2.2.CR1b, 8.2.2.ED.3).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).
TECH.9.4.2.DC.3	Explain how to be safe online and follow safe practices when using the internet (e.g., 8.1.2.NI.3, 8.1.2.NI.4).
TECH.9.4.2.DC.6	Identify respectful and responsible ways to communicate in digital environments.
TECH.9.4.2.DC.7	Describe actions peers can take to positively impact climate change (e.g., 6.3.2.CivicsPD.1).
TECH.9.4.2.TL.2	Create a document using a word processing application.
TECH.9.4.2.TL.5	Describe the difference between real and virtual experiences.
TECH.9.4.2.TL.6	Illustrate and communicate ideas and stories using multiple digital tools (e.g., SL.2.5.).
TECH.9.4.2.TL.7	Describe the benefits of collaborating with others to complete digital tasks or develop digital artifacts (e.g., W.2.6., 8.2.2.ED.2).

## Technology and Design Integration

---

CS.K-2.8.1.2.AP.4	Break down a task into a sequence of steps.
CS.K-2.8.1.2.AP.5	Describe a program's sequence of events, goals, and expected outcomes.
CS.K-2.8.1.2.CS.1	Select and operate computing devices that perform a variety of tasks accurately and quickly based on user needs and preferences.
CS.K-2.8.1.2.DA.1	Collect and present data, including climate change data, in various visual formats.
CS.K-2.8.1.2.DA.3	Identify and describe patterns in data visualizations.
CS.K-2.8.1.2.DA.4	Make predictions based on data using charts or graphs.
CS.K-2.8.2.2.ITH.4	Identify how various tools reduce work and improve daily tasks.

## Interdisciplinary Connections

---

LA.RI.4	Reading Informational Text
LA.RI.4.1	Refer to details and examples in a text and make relevant connections when explaining what the text says explicitly and when drawing inferences from the text.
LA.RI.4.3	Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.
LA.RI.4.4	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.
LA.RI.4.5	Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.
LA.RI.4.6	Compare and contrast a firsthand and secondhand account of the same event or topic; describe the differences in focus and the information provided.

LA.RI.4.8	Explain how an author uses reasons and evidence to support particular points in a text.
LA.RI.4.9	Integrate and reflect on (e.g., practical knowledge, historical/cultural context, and background knowledge) information from two texts on the same topic in order to write or speak about the subject knowledgeably.
LA.SL.4	Speaking and Listening
LA.SL.4.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts, building on others' ideas and expressing their own clearly.
LA.SL.4.2	Paraphrase portions of a text read aloud or information presented in diverse media and formats (e.g., visually, quantitatively, and orally).
LA.SL.4.3	Identify the reasons and evidence a speaker provides to support particular points.
LA.SL.4.4	Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.

## **Differentiation**

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

#### Exit Ticket: Use Data to Inform Differentiation

Every lesson closes with an Exit Ticket. Differentiation recommendations reside in the Teacher Edition to make the Exit Ticket data actionable.

•

## **Modifications and Accommodations**

---

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

## **Modifications and Accommodations used in this unit:**

### **Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

#### **Schoolwide Benchmark assessments:**

Aimswest benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

#### **Additional Benchmarks used in this unit:**

Reveal Unit assessments

### **Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

#### **Formative Assessments used in this unit:**

Teacher observation

Checklists

Questioning and Discussion

Quizzes

## **Summative Assessments**

---

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

### **Summative assessments for this unit:**

End of Unit assessments

## **Instructional Materials**

---

See above

## **Standards**

---

MA.4.OA.B.4

Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

MA.4.OA.C.5

Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself.
