

# Nov. Fitness Unit (3-5)

Content Area: **P.E.**  
Course(s):  
Time Period: **November**  
Length: **4-5 Weeks**  
Status: **Published**

## **Unit Overview**

---

This unit teaches the vocabulary terms and skills needed to successfully complete each Fitness Gram test.  
This unit is repeated in the Spring.

## **Enduring Understandings**

---

Lifelong fitness is a goal that is achieved by developing the 5 components of fitness by completing the Fitness Gram. Students will be able to see how well they do on a test and then get a chance to improve in that area over the course of time and by setting goals of achievement.

## **Essential Questions**

---

- What are the vocabulary terms in Fitness Gram?
- What are the rules/violations for Fitness Gram?
- How do you play safely participate in Fitness Gram?
- What are your goals for improvement with Fitness Gram?

## **Instructional Strategies & Learning Activities**

---

### **Instructional Strategies & Learning Activities**

#### **Curl-up Test:**

A test of abdominal strength and endurance.

#### **Push-up Test:**

A test of upper body strength and endurance.

#### **Flex-arm Test:**

A test of upper body strength and endurance.

Pull-up test:

A test of upper body strength and endurance.

Trunk Lift:

Flexibility test of abdominal and back.

Shoulder Stretch:

Flexibility test of the shoulders.

Sit and Reach:

Flexibility test of the legs and back.

Pacer test:

Cardiovascular endurance test.

Shuttle Run:

Test of speed and agility.

---

## **Integration of Career Readiness, Life Literacies and Key Skills**

WRK.9.2.5.CAP	Career Awareness and Planning
WRK.9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
WRK.9.2.5.CAP.2	Identify how you might like to earn an income.
WRK.9.2.5.CAP.3	Identify qualifications needed to pursue traditional and non-traditional careers and occupations.
WRK.9.2.5.CAP.4	Explain the reasons why some jobs and careers require specific training, skills, and

	certification (e.g., life guards, child care, medicine, education) and examples of these requirements.
TECH.9.4.2.CI	Creativity and Innovation
TECH.9.4.2.CI.1	Demonstrate openness to new ideas and perspectives (e.g., 1.1.2.CR1a, 2.1.2.EH.1, 6.1.2.CivicsCM.2).
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT	Critical Thinking and Problem-solving
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive).  Critical thinkers must first identify a problem then develop a plan to address it to effectively solve the problem.  An individual's passions, aptitude and skills can affect his/her employment and earning potential.  Brainstorming can create new, innovative ideas.

## Technology and Design Integration

---

There is no technology used in this unit.

## Interdisciplinary Connections

---

LA.SL.3.3	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LA.L.3.6	Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal spatial and temporal relationships (e.g., After dinner that night we went looking for them).

## Differentiation

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical

location and/or student grouping

**Differentiation occurring in this unit:**

Students will have choice on when to stop the completion of the test.

---

**Modifications & Accommodations**

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

**Modifications and Accommodations used in this unit:**

Physical and learning accommodations based on individual IEP's will be closely monitored.

---

**Benchmark Assessments**

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

**Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

**Additional Benchmarks used in this unit:**

Teacher observation and recording growth milestones.

---

**Formative Assessments**

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when

they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

#### **Formative Assessments used in this unit:**

See notes in the Instructional Strategies and Learning activities section.

### **Summative Assessments**

---

**Summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

#### **Summative assessments for this unit:**

**Successful completion of their Fitness Gram card.**

### **Instructional Materials**

---

PE equipment related to lessons above.

### **Standards**

---

HE.3-5.2.2.5.LF.1	Explain the need to engage in physical activities on a voluntary basis for emotional and physical enjoyment.
HE.3-5.2.2.5.LF.2	Develop a movement vocabulary that is flexible and adaptable for personal physical activity and wellness.
HE.3-5.2.2.5.LF.3	Proactively engage in movement and physical activity for enjoyment individually or with others.
HE.3-5.2.2.5.LF.4	Perform and increase the range of motion in dynamic stretching and breathing exercises (e.g., dynamic cardiovascular warm-up exercises, martial arts, aerobics, yoga).
HE.3-5.2.2.5.PF.1	Identify the physical, social, emotional, and intellectual benefits of regular physical activity

that effect personal health.

HE.3-5.2.2.5.PF.2	Accept and respect others of all skill levels and abilities during participation.
HE.3-5.2.2.5.PF.3	Participate in moderate to vigorous age-appropriate physical fitness activities and build the skills that address each component of health-related fitness (e.g., endurance, strength, speed, agility, flexibility, balance).
HE.3-5.2.2.5.PF.4	Develop a short term and/or a long-term health-related fitness goal (e.g., cardiorespiratory endurance 'heart & lungs', muscular strength, muscular endurance, flexibility, body composition, nutrition) to evaluate personal health.
HE.3-5.2.2.5.PF.5	Determine how different factors influence personal fitness and other healthy lifestyle choices (e.g., heredity, physical activity, nutrition, sleep, technology).
HE.3-5.2.2.5.MSC.1	Demonstrate body management skills and control when moving in relation to others, objects, and boundaries in personal and general space (e.g., coordination, balance, flexibility, agility).
HE.3-5.2.2.5.MSC.4	Develop the necessary body control to improve stability and balance during movement and physical activity.
HE.3-5.2.2.5.MSC.5	Correct movement skills and analyze concepts in response to external feedback and self-evaluation with understanding and demonstrating how the change improves performance.
HE.3-5.2.2.5.MSC.7	Apply specific rules, strategies, and procedures for specific physical activity, games, and sports in a safe active environment.
