LA.WHST.6-8.6	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LA.WHST.6-8.7	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

## **Differentiation**

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

#### **Learners Reading and Writing Below Grade Level**

- **Read One Section at a Time** Break up the reading during the Visual Discovery activity so that students read only one section at a time.
- To break up the reading for *Physical Geography of Greece*:
- Ask all but the last bulleted question in Step 2. Have students read Section 2 and complete the corresponding Reading Notes.
- Ask the last bulleted question in Step 2. Have students read Section 3 and complete the corresponding Reading Notes.
- To break up the reading for *Ancient Greek Colonies and Trade Routes*: Ask all but the last two bulleted

questions in Step 5. Have students read Section 4 and complete the corresponding Reading Notes.

- Ask the last two bulleted questions in Step 5. Have students read Section 5 and complete the corresponding Reading Notes.
- **Scaffold the Reading Notes** Use the Guide to Reading Notes to scaffold the Reading Notes so that students take steps toward working more independently.
- For Section 2, omit key words that students can fill in.
- For Sections 3 and 4, provide prompts that students can complete.
- For Section 5, have students complete as written.

#### Learners with Special Education Needs

- **Divide the Preview Question** Divide the Preview question in the Interactive Student Notebook into two separate questions: *How do you think the physical geography of Greece influenced where people settled? and How do you think the physical geography of Greece influenced how people lived?* Students should write a brief response to each question.
- **Offer a Choice for the Processing Activity** Have students complete two of the four storyboard pages for the Processing activity. Allow students the choice of doing Pages 1 and 2 or Pages 3 and 4. Alternatively, consider pairing students to work together to complete all four pages of the storyboard.

#### Advanced Learners

- **Add Questions to the Debrief** Add the following questions to Step 8 in the Visual Discovery activity:

---

### Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

**Modifications and Accommodations used in this unit:**

IEP and 504 Accommodations will be utilized.

---

### Benchmark Assessments

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

**Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

**Additional Benchmarks used in this unit:**

sentence construction

paragraph writing

DBQ

## **Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

**Formative Assessments used in this unit:**

See assessments listed above.

## **Summative Assessments**

---

**Summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

**Summative assessments for this unit:**

See assessments listed above.
