

# Sept. Gr. 5 Technology

Content Area: **Technology**  
Course(s):  
Time Period: **September**  
Length: **4-5 Weeks**  
Status: **Published**

## Unit Overview

---

Students will work on the Endangered Species Project and create a finished document for publishing.

Students will continue learning coding.

## Enduring Understandings

---

Technology helps us to publish professional documents.

Coding is the language we use to write programming.

## Essential Questions

---

What tools can we use to produce professional documents?

## Instructional Strategies & Learning Activities

---

### **Objective: National Geographic Kids Research & Word document using Pic Tools**

The student will be able to conduct research create documents which combine various types of objects on a Word document - Word Art, Text Box, & Image

Students will use Word to create today's project which will require students to create 5 pages of Endangered Species fact sheets.

Differentiation:

Students choose animals and creative elements.

Assessment:

Printed pages.

### **Objective: Intro to Coding - ONLINE activites code.org (Course F)**

The student will be able to begin to learn and understand basic concepts about coding - algorithms, loops, & conditionals - creating code in a "blockly" language which writes Javascript 'under the hood'.

**Differentiation:**

Self-paced

**Assessment:**

Teacher dashboard reports

## **Integration of Career Readiness, Life Literacies and Key Skills**

---

WRK.9.2.5.CAP	Career Awareness and Planning
WRK.9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
WRK.9.2.5.CAP.2	Identify how you might like to earn an income.
WRK.9.2.5.CAP.3	Identify qualifications needed to pursue traditional and non-traditional careers and occupations.
WRK.9.2.5.CAP.4	Explain the reasons why some jobs and careers require specific training, skills, and certification (e.g., life guards, child care, medicine, education) and examples of these requirements.
TECH.9.4.5.CI	Creativity and Innovation
TECH.9.4.5.CI.2	Investigate a persistent local or global issue, such as climate change, and collaborate with individuals with diverse perspectives to improve upon current actions designed to address the issue (e.g., 6.3.5.CivicsPD.3, W.5.7).
TECH.9.4.5.CT	Critical Thinking and Problem-solving
TECH.9.4.5.CT.2	Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem (e.g., 2.1.5.CHSS.1, 4-ESS3-1).
TECH.9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global (e.g., 6.1.5.CivicsCM.3).
TECH.9.4.5.DC.1	Explain the need for and use of copyrights.
TECH.9.4.5.DC.2	Provide attribution according to intellectual property rights guidelines using public domain or creative commons media.
TECH.9.4.5.DC.3	Distinguish between digital images that can be reused freely and those that have copyright restrictions.
TECH.9.4.5.DC.4	Model safe, legal, and ethical behavior when using online or offline technology (e.g., 8.1.5.NI.2).
TECH.9.4.5.GCA	Global and Cultural Awareness
TECH.9.4.5.GCA.1	Analyze how culture shapes individual and community perspectives and points of view (e.g., 1.1.5.C2a, RL.5.9, 6.1.5.HistoryCC.8).
TECH.9.4.5.IML.1	Evaluate digital sources for accuracy, perspective, credibility and relevance (e.g., Social Studies Practice - Gathering and Evaluating Sources).
TECH.9.4.5.IML.2	Create a visual representation to organize information about a problem or issue (e.g., 4.MD.B.4, 8.1.5.DA.3).
TECH.9.4.5.IML.4	Determine the impact of implicit and explicit media messages on individuals, groups, and society as a whole.
TECH.9.4.5.IML.5	Distinguish how media are used by individuals, groups, and organizations for varying

purposes. (e.g., 1.3A.5.R1a).

TECH.9.4.5.IML.6

Use appropriate sources of information from diverse sources, contexts, disciplines, and cultures to answer questions (e.g., RI.5.7, 6.1.5.HistoryCC.7, 7.1.NM. IPRET.5).

TECH.9.4.5.IML.7

Evaluate the degree to which information meets a need including social emotional learning, academic, and social (e.g., 2.2.5. PF.5).

The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.

Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills.

An individual's passions, aptitude and skills can affect his/her employment and earning potential.

## **Technology and Design Integration**

---

See activities above and standards below.

CS.3-5.8.1.5.AP.1

Compare and refine multiple algorithms for the same task and determine which is the most appropriate.

CS.3-5.8.1.5.AP.2

Create programs that use clearly named variables to store and modify data.

CS.3-5.8.1.5.AP.3

Create programs that include sequences, events, loops, and conditionals.

CS.3-5.8.1.5.AP.4

Break down problems into smaller, manageable sub-problems to facilitate program development.

CS.3-5.8.1.5.AP.5

Modify, remix, or incorporate pieces of existing programs into one's own work to add additional features or create a new program.

CS.3-5.8.1.5.AP.6

Develop programs using an iterative process, implement the program design, and test the program to ensure it works as intended.

CS.3-5.AP

Algorithms & Programming

Programming languages provide variables, which are used to store and modify data.

Programs can be broken down into smaller parts to facilitate their design, implementation, and review. Programs can also be created by incorporating smaller portions of programs that already exist.

A variety of control structures are used to change the flow of program execution (e.g., sequences, events, loops, conditionals).

Different algorithms can achieve the same result. Some algorithms are more appropriate for a specific use than others.

Individuals develop programs using an iterative process involving design, implementation, testing, and review.

## **Interdisciplinary Connections**

---

LA.RI.5.4

Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.

LA.W.5.2.D

Use precise language and domain-specific vocabulary to inform about or explain the topic.

LA.W.5.6

With some guidance and support from adults and peers, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others;

	demonstrate sufficient command of keyboarding skills to type a minimum of two pages in a single sitting.
LA.W.5.7	Conduct short research projects that use several sources to build knowledge through investigation of different perspectives of a topic.
LA.SL.5.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.
LA.SL.5.5	Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.
LA.L.5.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
LA.L.5.2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
LA.L.5.3	Use knowledge of language and its conventions when writing, speaking, reading, or listening.
LA.L.5.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 5 reading and content, choosing flexibly from a range of strategies.

## **Differentiation**

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

Differentiation will be offered as listed in the above activities.

## **Modifications & Accommodations**

---

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

**Modifications and Accommodations used in this unit:**

IEP and 504 Accommodations will be utilized.

**Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

**Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

**Additional Benchmarks used in this unit:**

Teacher made assessments to measure growth.

**Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

**Formative Assessments used in this unit:**

Discussion

Teacher observation

projects

### **Summative Assessments**

---

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

#### **Summative assessments for this unit:**

Projects

Assessments listed above

### **Instructional Materials**

---

Materials as needed for projects

### **Standards**

---

See Standards listed above.
