

Nov. SW Gr. 1 WRITING: How Writers Work

Content Area: **English**
Course(s):
Time Period: **November**
Length: **4-5 Weeks**
Status: **Published**

Unit Overview

Text Type: Launching

This unit was created to introduce your students to writing workshop, to the writing process, and to getting to know why writers write in the ways they do. The mentor texts in this unit of study will help students think about what authors and illustrators are thinking and feeling when they write and draw. They will also encourage young students to notice how authors incorporate personal experiences, emotions, and details to enhance readers' experiences. In order for a writing workshop to run smoothly, students will need to know what is expected of them. Procedural conversations such as how writing workshop will function, what writing tools are and how they will be used, where these tools will be stored, and how students will discuss and share their ideas are also presented in this unit.

Enduring Understandings

Students will recognize that writers and illustrators pay attention to the world around them in order to connect their words to the illustrations and help their readers make the same connection.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.
- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Student Strengths and weaknesses will be assessed and monitored, and individualized/differentiated learning will be assigned as appropriate.

Modifications & Accommodations

IEP accommodations, and modifications will be in place, and teacher assigned modifications and accommodations will be assigned, assessed, and monitored.

Follow IEP accommodations and differentiate materials, project requirements as needed.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Additional Modifications and Accommodations used in this unit:

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher Conferences

writing drafts

anecdotal records

Benchmark Assessments

Writing Sample administered twice a year.

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Student Self-Reflection

uses students' published pieces and a self-assessment handout for students to complete.

Rationale: Reflective practices help us learn and grow as writers. A self-assessment instrument will help students

reflect on and understand how they have evolved and grown as writers.
