Content Area: **English**
Course(s):
Time Period: **November**
Length: **8-10 Weeks**
Status: **Published**

Unit Overview

This unit explores all aspects of reading Fiction through the Readers Workshop model.

DESCRIPTION

Readers of all ages are drawn to fiction, and it may very well be the genre students are most likely to choose as they search through a library or bookstore. Fiction stories are typically the stories your students will be most familiar with. These are the stories they remember hearing when they were younger—the stories told and retold from generation to generation, from one culture to another. Each story takes you on a journey, an adventure, and an experience with memorable characters and events. The world is full of stories, and through stories we learn about ourselves and others.

Enduring Understandings

Students will: n Explain differences between fiction books that are realistic versus fantastical; n Recognize different types and structures of fiction (fantasy, traditional tales, and realistic); n Identify common story elements and key details in fictional texts (characters, setting, problem, and solution); n Understand the narrative structure of fiction (beginning, middle, and end); n Retell familiar stories using story structure and key details; n Compare and contrast two familiar tales; n Use personal schema and textual evidence to make predictions and connections; n Infer characters' traits and feelings using personal schema and textual evidence; n Ask questions to help clarify thinking and deepen understanding; n Use strategies before, during, and after reading to enhance comprehension of texts; n Apply self-monitoring skills and strategies to determine the meaning of important vocabulary; n Identify big ideas and supporting details within texts; n Synthesize information presented within and across fiction texts; n Use illustrations in a story to describe its characters, settings, and events; n Deepen their understanding of author's purpose as it relates to the fiction genre; and n Read expressively.

The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

Essential Questions

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.

- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Choices of personal reading texts will be leveled or matched to each students interest and comfort levels.

Modifications & Accommodations

IEP and 504 accommodations will be utilized.

Follow IEP accommodations and differentiate materials, project requirements as needed.

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Benchmark Assessments

DRA

Aimsweb three times a year

Linkit testing 3 times a year.

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Anecdotal notes

Assigned homework

Student participation

Independent group work/projects

Appendix

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:
