Unit Overview

The beginning of the school year is an exciting time! Students enter their classrooms with a heightened sense of curiosity and wonder. First impressions go a long way for young learners, and it is important for them to experience a comfortable and engaging invitation into their literacy-rich environment. Brightly decorated bulletin boards, shiny desks and tables, and beautifully organized books await your students. The start of each new school year provides opportunities for you and your students to create a community of learners who respect, listen to, share, and respond to the thoughts and ideas of others. This is especially important when considering your community of readers.

Enduring Understandings

Students will: ■ Develop an understanding of themselves as readers; ■ Develop habits of mind for engaging with a variety of texts; ■ Learn and apply the expectations and routines for active participation in a reading community; ■ Self-select appropriate texts and apply self-monitoring skills; ■ Cite textual evidence to support analysis of text; ■ Determine themes or central idea(s) of a text; ■ Analyze story elements and their role in fiction; ■ Use a variety of strategies to determine the meaning of challenging words and phrases in a text; ■ Analyze the impact of word choices on meaning and tone; ■ Analyze how the structure of texts supports meaning; ■ Utilize multimedia sources to support understanding of a topic; ■ Apply comprehension strategies to increase proficiency in understanding complex texts across fiction, poetry, and nonfiction; ■ Prepare for and engage in a range of collaborative conversations to deepen their own and others' understanding of texts; ■ Write routinely to process their thinking about texts; and ■ Set and monitor goals for themselves as readers. The aforementioned outcomes reflect the College and Career Readiness grade-specific standards in reading, speaking, and listening. They define the skills and understandings that students must demonstrate at the end of each grade level.

Interdisciplinary Connections

Various disciplines will be explored through group texts and individual leveled, choice texts.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.

- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will have access to leveled libraries of a variety of texts and be able to choose based on interest.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

IEP and 504 accommodations will be utilized.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

Additional Benchmarks used in this unit:

Writing Samples

Linkit testing 3 times a year.

Aimsweb

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion
Teacher observation
worksheets
projects
teacher made tests

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
