Content Area: **English**
Course(s): **Language Arts**
Time Period: **March**
Length: **4 weeks**
Status: **Published**

Unit overview

This unit is all about engaging students in poetry while continuing to foster their skills as analytical writers. Students will be challenged to analyze many forms of poetry; additionally, they will create a comparative literary essay focusing on two poems. This essay may be thematic or focus on author's craft.

Enduring Understandings

- Students will recognize and understand the varied figurative language often used in poetry.
- Students will recognize and understand poetry has a form of artistic expression and that different types of poetry have different structures.
- Students will recognize and understand that poetry expresses and evokes different emotions by using sensory images, movement, sound, voice, etc.
- Students will recognize and understand that poetry is written in specific structure, every aspect of a poem has a purpose.
- Students will understand how to craft a comparative literary essay focusing on author's craft or theme.

Essential Questions

- How does poetry contribute to our understanding of self, others, and the world?
- What literary devices do poets use in order to create meaning?
- How do writers craft a comparative literary essay?

Instructional Strategies and Learning Activities

Week 1: In this unit, students will participate in a "March Madness" style poetry face-off. The unit begins with a brief review of poetry terms (stanza, figurative language, etc.). Students are then exposed to the "Sweet 16:" for four days, students will read four poems each day (two traditionally written poems and two videos of

spoken word poetry). Students will analyze each poem by responding to the following questions:

- Give a 1-2 sentence summary of the poem's literal meaning.
- What figurative meanings do you see? What theme(s) are developed here?
- Do any lines stand out to you? What type of author's craft is being used?

Week 2: The unit will then focus on digging deeper into analysis. Students will take their "Elite 8" poems and reread/relisten, with a focus on themes, author's craft, and emotional response to the poetry. The next day, students will work collaboratively in small groups to analyze the "Final Four" poems. They will prepare a presentation that explains why the poem should move to the final round. Once the final two poems are selected, students will vote for a winner of March Madness. At the end of the week, students will be introduced to the comparative literary essay assignment. Students will choose any **two** of the Sweet 16 poems to use for their comparative literary essay.

Week 3: Lessons will focus on how to plan for/organize a comparative literary essay. Students will create a thesis statement and will develop an outline including topic sentences and text evidence. Students will craft strong body paragraphs as well as a clear introduction and conclusion. The teacher will provide students with models and explicit writing instruction. Additional emphasis will be added on the use of comparative transitions.

Week 4: With the help/guidance of teachers and peers, students will revise and edit their literary essays prior to final submission.

Interdisciplinary Connections

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**

- Content – the specific information that is to be taught in the lesson/unit/course of instruction.
- Process – how the student will acquire the content information.
- Product – how the student will demonstrate understanding of the content.
- Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit: student choice; small group/individual conferences; graphic organizers as needed

Modifications and Accommodations

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Linkit Benchmarks 3X a year

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit: in-class discussions, completed classwork, draft of literary essay

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
