Gr. 8 ELA Unit 7: Crafting Reviews

Content Area: **English**
Course(s): **Language Arts**
Time Period: **June**
Length: **4 weeks**
Status: **Published**

Unit overview

This unit will help students explore a variety of reviews; these informational/argumentative pieces will focus on books, restaurants, experiences, products, etc.. Students will review a variety of topics, and will ultimately choose one to write about in a multi-paragraph review. Students will raise the level of their writing by considering tone, diction, and audience. Students will be challenged to depart from a traditionally "structured" essay and use the format that best suits their needs in this piece.

Enduring Understandings

Students will recognize and understand that it is important for writers to consider audience when reviewing a text or product.

Students will recognize and understand that writing a review involves both argumentative and informational writing.

Essential Questions

- What makes a review engaging?
- How do writers organize reviews?
- How do writers consider audience when crafting a review?

Instructional Strategies and Learning Activities

This unit will immerse students in the genre of reviews. Students will learn what it means to evaluate a product or experience. They will read, watch, and discuss a variety of reviews, noticing not only the content but the stylistic choices made by the writer. Students will brainstorm ideas for possible reviews, trying out many different avenues before committing to an idea for their final publication. They will develop specific criteria needed to evaluate the worth of the topic, and will draft reviews including engaging leads and conclusions. Revision lessons will include tone and word choice. Students will participate in peer editing prior to submitting their reviews.

Interdisciplinary Connections

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components**:

  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

  Differentiation occurring in this unit: small group or individual conferences, student choice, graphic organizers as needed

Modifications and Accommodations

Modifications and Accommodations as per student IEPs and 504s.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Linkit Benchmarks 3X a year

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit: in-class discussions; graded homework and classwork; review revisions

Summative Assessments

Summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit: Final review, graded using a rubric
