The potential for building and using personal wealth includes responsibility to the broader community and an understanding of the legal rights and responsibilities of being a good citizen. An essential aspect of problem solving is being able to self-reflect on why possible solutions for solving problems were or were not successful. There are strategies to build and maintain a good credit history. Marketing techniques are designed to encourage individuals to purchase items they may not need or want. There are strategies to increase your savings and limit debt. Individuals can use their talents, resources, and abilities to give back. Multiple solutions often exist to solve a problem. Gathering and evaluating knowledge and information from a variety of sources, including global perspectives, fosters creativity and innovative thinking. Philanthropic and charitable organizations play important roles in supporting the interests of individuals and local and global communities and the issues that affect them. An individual's strengths, lifestyle goals, choices, and interests affect employment and

income.

An individual's values and emotions will influence the ability to modify financial behavior (when appropriate), which will impact one's financial well-being.

Awareness of and appreciation for cultural differences is critical to avoid barriers to productive and positive interaction.

CS.6-8.CS	Computing Systems
CS.6-8.IC	Impacts of Computing
CS.6-8.ITH	Interaction of Technology and Humans
	Economic, political, social and cultural aspects of society drive development of new technological products, processes, and systems.
	Technology interacts with society, sometimes bringing about changes in a society's economy, politics, and culture, and often leading to the creation of new needs and wants. New needs and wants may create strains on local economies and workforces. Improvements in technology are intended to make the completion of tasks easier, safer, and/or more efficient.
	Advancements in computing technology can change individuals' behaviors. Society is faced with trade-offs due to the increasing globalization and automation that computing brings.
	People use digital devices and tools to automate the collection, use, and transformation of data. The manner in which data is collected and transformed is influenced by the type of digital device(s) available and the intended use of the data.

Interdisciplinary Connections
