Unit Overview

Students learn about the rules in the classroom, and why they are important. Students will learn and understand the importance of building a strong classroom community.

Enduring Understandings

Students will understand that rules and routines are important. All people are different and should be treated fairly. A successful classroom works well when all members are contributing and being respectful.

Essential Questions

Do we need rules?

Do we need school rules?

What is fairness?

How can we be contributing members of our classroom?

What classroom rules are important?

Instructional Strategies and Learning Activities

Students take part in various activities and discussions about the rules in the classroom and why they are important to the class being able to work and learn together. Students learn management techniques and help establish rules to keep the classroom peaceful and successful.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when

they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

exit cards, anecdotal notes, teacher observation, completion of activity/task

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.
