

# Nov. Gr. 2: Unit 3: How do you Think?

Content Area: **Health**  
Course(s):  
Time Period: **November**  
Length: **4-5 Weeks**  
Status: **Published**

## **Unit Overview**

---

Students learn all about the brain in this unit.

## **Enduring Understandings**

---

We use our brains to think and control our body systems.

We make decisions with our brain through different processes.

We must take care of our brain both inside and out.

## **Essential Questions**

---

How do we think?

How does your brain learn?

How can we think about thinking?

How do we take care of our brain?

## **Instructional Strategies & Learning Activities**

---

Explain the major parts of your brain and how the brain works as a control center for your body.

Develop respect for the functions of the brain through a variety of activities.

Practice using different functions controlled by the brain.

Analyze the different ways the brain handles the needs of the body.

Discover and label the different ways your brain learns.

Develop sensitivity to the many different ways that different people can be smart.

Practice learning in different ways.

Analyze different methods people use to learn and remember.

Investigate and label different influences on the way you think.

Build basic thinking skills through decision making

Use Decision making Steps to avoid unhealthy influences.

List ways to protect your brain from injury and from damage due to drugs.

Increase the desire to protect the brain by realizing it cannot be replaced.

Use the Predicting Consequences Steps in scenarios to determine the likelihood of head injury.

## **Integration of Career Readiness, Life Literacies and Key Skills**

---

WRK.9.1.2.CAP	Career Awareness and Planning
WRK.9.1.2.CAP.1	Make a list of different types of jobs and describe the skills associated with each job.
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive). Critical thinkers must first identify a problem then develop a plan to address it to effectively solve the problem. Different types of jobs require different knowledge and skills. Brainstorming can create new, innovative ideas.

## **Technology and Design Integration**

---

Students will interact with the lesson using the Smartboard.

TECH.8.1.2	Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.
TECH.8.1.2.A	Technology Operations and Concepts: Students demonstrate a sound understanding of technology concepts, systems and operations
TECH.8.1.2.A.CS1	Understand and use technology systems.

## Interdisciplinary Connections

---

LA.RF.2.3	Know and apply grade-level phonics and word analysis skills in decoding words.
LA.RF.2.4	Read with sufficient accuracy and fluency to support comprehension.
LA.RI.2.1	Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
LA.RI.2.4	Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.
LA.RI.2.5	Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.
LA.RI.2.6	Identify the main purpose of a text, including what the author wants to answer, explain, or describe.
LA.SL.2.1	Participate in collaborative conversations with diverse partners about grade 2 topics and texts with peers and adults in small and larger groups.
LA.SL.2.2	Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.

## Differentiation

---

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
  - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
  - Process – how the student will acquire the content information.
  - Product – how the student will demonstrate understanding of the content.
  - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

### **Differentiation occurring in this unit:**

Students will be monitored for the need for challenge or support.

## Modifications & Accommodations

---

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

**Modifications and Accommodations used in this unit:**

504 and IEP accommodations will be utilized.

**Benchmark Assessments**

---

**Benchmark Assessments** are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

**Schoolwide Benchmark assessments:**

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

**Additional Benchmarks used in this unit:**

Teacher made assessments to measure growth over time.

**Formative Assessments**

---

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

**Formative Assessments used in this unit:**

Discussion

Teacher observation

## **Summative Assessments**

---

**summative assessments** evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

### **Summative assessments for this unit:**

Worksheets

Unit tests

## **Instructional Materials**

---

A variety of instructional materials are available in the health and PE

## **Standards**

---

HPE.2.1.2.A.2	Use correct terminology to identify body parts, and explain how body parts work together to support wellness.
HPE.2.1.2.D.1	Identify ways to prevent injuries at home, school, and in the community (e.g., fire safety, poison safety, accident prevention).
HPE.2.1.2.D.3	Identify procedures associated with pedestrian, bicycle, and traffic safety.
HPE.2.1.2.D.CS1	Using personal safety strategies reduces the number of injuries to self and others.
HPE.2.3.2.B.1	Identify ways that drugs can be abused.
HPE.2.3.2.B.4	Identify products that contain alcohol.
HPE.2.3.2.B.5	List substances that should never be inhaled and explain why.
HPE.2.3.2.B.CS1	Use of drugs in unsafe ways is dangerous and harmful.
