

Dec. Gr. 2 Unit 4: The Wide World of Food

Content Area: **Health**
Course(s):
Time Period: **December**
Length: **6-8 Weeks**
Status: **Published**

Unit Overview

Students learn all about healthy food choices.

Enduring Understandings

Food fuels our bodies.

Healthy food choices are important to staying healthy.

We need to pay attention to when we eat and what we eat.

Essential Questions

What is food?

Why do we need to make healthy choices?

When do we need to eat our healthy choices so they work the best for our bodies?

Instructional Strategies & Learning Activities

Explain how the healthy Food Plate helps you choose healthful food.

Evaluate menus using the healthy Food Plate.

Classify foods into the Healthy Food Plate . (My Plate.) groups.

Define and explain the role of nutrients in the body.

Analyze the influences upon your food choices.

Explain the effect of healthful and less healthful food on the body.

Explain why guidelines for food handling and storage should be respected.

Apply Decision Making Steps to determine healthful snacks

Explain why a good breakfast is such an important meal.

Compare and contrast healthful and less healthful breakfasts. .

Integration of Career Readiness, Life Literacies and Key Skills

WRK.9.1.2.CAP	Career Awareness and Planning
WRK.9.1.2.CAP.1	Make a list of different types of jobs and describe the skills associated with each job.
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive). Critical thinkers must first identify a problem then develop a plan to address it to effectively solve the problem. Different types of jobs require different knowledge and skills. Brainstorming can create new, innovative ideas.

Technology and Design Integration

Students will interact with the unit using the Smartboard.

TECH.8.1.2	Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.
TECH.8.1.2.A.4	Demonstrate developmentally appropriate navigation skills in virtual environments (i.e., games, museums).

Interdisciplinary Connections

LA.RF.2.3	Know and apply grade-level phonics and word analysis skills in decoding words.
LA.RF.2.4	Read with sufficient accuracy and fluency to support comprehension.
LA.RI.2.1	Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
LA.RI.2.4	Determine the meaning of words and phrases in a text relevant to a grade 2 topic or

	subject area.
LA.RI.2.5	Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.
LA.RI.2.6	Identify the main purpose of a text, including what the author wants to answer, explain, or describe.
LA.SL.2.1	Participate in collaborative conversations with diverse partners about grade 2 topics and texts with peers and adults in small and larger groups.
LA.SL.2.2	Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.
- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Students will be monitored for the need for challenge or support.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

504 and IEP accommodations will be utilized.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Teacher made assessments, pre and post to assess growth over time.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Discussion

Teacher observation

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Worksheets

Unit tests

Instructional Materials

A variety of instructional materials are available in the health and PE

Standards

HPE.2.1.2.A.CS1	Health-enhancing behaviors contribute to wellness.
HPE.2.1.2.B.1	Explain why some foods are healthier to eat than others.
HPE.2.1.2.B.2	Explain how foods on MyPlate differ in nutritional content and value.
HPE.2.1.2.B.3	Summarize information about food found on product labels.
HPE.2.1.2.B.CS1	Choosing a balanced variety of nutritious foods contributes to wellness.
HPE.2.2.2.B.1	Explain what a decision is and why it advantageous to think before acting.
HPE.2.2.2.B.2	Relate decision-making by self and others to one's health.
HPE.2.2.2.B.3	Determine ways parents, peers, technology, culture, and the media influence health decisions.
HPE.2.2.2.B.4	Select a personal health goal and explain why setting is important.
HPE.2.2.2.B.CS1	Effective decision-making skills foster healthier lifestyle choices.
