

Jan. Gr. 2 P.E. Stations

Content Area: **P.E.**
Course(s):
Time Period: **January**
Length: **3-4 Weeks**
Status: **Published**

Unit Overview

Students will be able to transfer previously introduced skills and techniques in new small group situations using known and new manipulatives.

Enduring Understandings

Students will be able to verbalize and demonstrate proper fundamental techniques of each designated skill and use manipulatives properly, individually, and with small groups and relay on how these skills can be used in other situations.

Essential Questions

How are you able to use a particular manipulative in a variety of ways?

Why is it important to follow auditory cues for safety?

Instructional Strategies & Learning Activities

Variety of activities that incorporate physical skills previously learned and incorporate new manipulatives include but are not limited to:

Examples:

Scooters

tossing and catching (various items)

hula hoops

jump rope

broad jump

scarves (juggling)

fling its

building blocks (design/building)

roller racers

balancing

Integration of Career Readiness, Life Literacies and Key Skills

WRK.9.1.2.CAP	Career Awareness and Planning
WRK.9.1.2.CAP.1	Make a list of different types of jobs and describe the skills associated with each job.
TECH.9.4.2.CI.2	Demonstrate originality and inventiveness in work (e.g., 1.3A.2CR1a).
TECH.9.4.2.CT.3	Use a variety of types of thinking to solve problems (e.g., inductive, deductive). Critical thinkers must first identify a problem then develop a plan to address it to effectively solve the problem. Different types of jobs require different knowledge and skills. Brainstorming can create new, innovative ideas.

Technology and Design Integration

No technology necessary for this unit.

Interdisciplinary Connections

MA.1.NBT.A.1	Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.
MA.1.G.A.2	Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.
LA.SL.1.1.A	Follow agreed-upon norms for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
LA.SL.1.1.C	Ask questions to clear up any confusion about the topics and texts under discussion.
SOC.6.1.4.A.1	Explain how rules and laws created by community, state, and national governments protect the rights of people, help resolve conflicts, and promote the common good.
SOC.6.1.4.A.CS1	Rules and laws are developed to protect people's rights and the security and welfare of society.

Differentiation

- Understand that gifted students, just like all students, come to school to learn and be challenged.
- Pre-assess your students. Find out their areas of strength as well as those areas you may need to address before students move on.
- Consider grouping gifted students together for at least part of the school day.
- Plan for differentiation. Consider pre-assessments, extension activities, and compacting the curriculum.
- Use phrases like "You've shown you don't need more practice" or "You need more practice" instead of words like "qualify" or "eligible" when referring to extension work.
- Encourage high-ability students to take on challenges. Because they're often used to getting good grades, gifted students may be risk averse.

- **Definitions of Differentiation Components:**
 - Content – the specific information that is to be taught in the lesson/unit/course of instruction.
 - Process – how the student will acquire the content information.
 - Product – how the student will demonstrate understanding of the content.
 - Learning Environment – the environment where learning is taking place including physical location and/or student grouping

Differentiation occurring in this unit:

Different size equipment may be offered to assist skill successes. Goals for manipulatives may be adjusted for skill success.

Modifications & Accommodations

Refer to QSAC EXCEL SMALL SPED ACCOMMODATIONS spreadsheet in this discipline.

Modifications and Accommodations used in this unit:

Physical and learning accommodations based on individual IEP's will be closely monitored.

Benchmark Assessments

Benchmark Assessments are given periodically (e.g., at the end of every quarter or as frequently as once per month) throughout a school year to establish baseline achievement data and measure progress toward a standard or set of academic standards and goals.

Schoolwide Benchmark assessments:

Aimsweb benchmarks 3X a year

Linkit Benchmarks 3X a year

DRA

Additional Benchmarks used in this unit:

Observation of students ability within individual lessons to demonstrate appropriate use of manipulatives and following directions for auditory cues. Teacher observation and checklist.

Formative Assessments

Assessment allows both instructor and student to monitor progress towards achieving learning objectives, and can be approached in a variety of ways. **Formative assessment** refers to tools that identify misconceptions, struggles, and learning gaps along the way and assess how to close those gaps. It includes effective tools for helping to shape learning, and can even bolster students' abilities to take ownership of their learning when they understand that the goal is to improve learning, not apply final marks (Trumbull and Lash, 2013). It can include students assessing themselves, peers, or even the instructor, through writing, quizzes, conversation, and more. In short, formative assessment occurs throughout a class or course, and seeks to improve student achievement of learning objectives through approaches that can support specific student needs (Theal and Franklin, 2010, p. 151).

Formative Assessments used in this unit:

Observation of students ability to demonstrate appropriate techniques for use of manipulatives in designated areas with minimal reminders. Individual discussion with students giving suggestions and corrections as needed for the activity.

Summative Assessments

summative assessments evaluate student learning, knowledge, proficiency, or success at the conclusion of an instructional period, like a unit, course, or program. Summative assessments are almost always formally graded and often heavily weighted (though they do not need to be). Summative assessment can be used to great effect in conjunction and alignment with formative assessment, and instructors can consider a variety of ways to combine these approaches.

Summative assessments for this unit:

Observation of students ability to demonstrate appropriate techniques for use of manipulatives in designated

areas without reminders. Tracking of daily skills, progress of individual student for the entire unit.

Instructional Materials

Materials include but are not limited to:

Lines on gym floor

cones

foam balls

playground balls

foam blocks

jump ropes

scooters

scarves

roller racers

hula hoops

Standards

HE.K-2.2.1.2.EH.2	Identify what it means to be responsible and list personal responsibilities.
HE.K-2.2.1.2.EH.3	Demonstrate self-control in a variety of settings (e.g., classrooms, playgrounds, special programs).
HE.K-2.2.1.2.EH.4	Demonstrate strategies for managing one's own emotions, thoughts and behaviors.
HE.K-2.2.2.2.PF.2	Explore how to move different body parts in a controlled manner.
HE.K-2.2.2.2.PF.3	Engage in moderate to vigorous age-appropriate physical movement and physical activities that promote movement (e.g., games, challenges, team building).
HE.K-2.2.2.2.MSC.1	Perform a combination of sequences of locomotor movements and rhythmic activities (e.g., walking, balancing, hopping, skipping, running).
HE.K-2.2.2.2.MSC.2	Differentiate non-locomotor and locomotor movements as well transferring body weight (e.g., stretching, bending, twisting, curling).
HE.K-2.2.2.2.MSC.3	Demonstrate manipulative movements (e.g., throwing, catching, dribbling, running, kicking) while moving in personal and general space, time, directions, pathways and ranges.
HE.K-2.2.2.2.MSC.4	Differentiate manipulative movements (e.g., throwing, catching, dribbling).

HE.K-2.2.2.2.MSC.5

Adjust and correct movements and skill in response to feedback.

HE.K-2.2.2.2.MSC.6

Execute appropriate behaviors and etiquette while participating in activities, games, sports, and other events to contribute to a safe environment.

HE.K-2.2.2.2.MSC.7

Demonstrate kindness towards self and others during physical activity to create a safe and caring environment.

Teamwork consists of effective communication and respect among class and team members.
