Students work cooperatively in groups to read the primary source material about the South's secession in the 1860's and to teach it to the rest of their classmates. They break down the lesson together and decide how it

will be taught and who assumes the various teaching responsibilities. Students will have a Yes/No/Maybe debate on whether the secession was justified. Students will be broken into groups to represent each side of the issue. Students will collaborate to come up with a statement that they will be presenting to the class to state their opinion for discussion and debate. Students will also read from the primary source that corresponds to their position. Students will also read from the primary source that corresponds to their position.

The room will be split into the supporters of southern secession on one side and the detractors on the other. Those students not committing to a point of view initially will be to the side. Supporters of each side will begin by reading aloud from the primary text of their position. Then, students will respectfully take turns presenting reasons for their position in hopes of convincing others to join their side. Students are free to move from one location to another if/when they are convinced another location is a better fit for them .

- Responsible Listening
- Peer Opinion Sharing: Yes-No- Maybe* STAT discussion questions
- Audience-Focused Communication

When everyone who wants to share has finished, students return to their seats. They will then discuss what if any points were made that convinced them of their stance on southern secession. Students will also discuss what they got out of the lesson. Respectful dialogue can only occur when people are willing to truly listen to what others are saying. There are no right or wrong answers in this lesson.
