

Instructional Lesson Plan

Content Area(s)/Course/Grade:

Science Grade 5

Unit:

Chapter 6: Earth and Space

Lesson Topic:

Space unit

Approx. Date/s:

Week of May 29th

Diversity Integration Topic:

Famous Astronauts from different cultural backgrounds (project at the end of the unit)

NJSL Standard/s:

8.1.5.F.1, 5-ESS2-1, 5-ESS2-2, 5-ESS3-1, 5-PS2-1, 5-ESS1-1, 5-ESS1-2

Textbook, Materials, Resources:

Research outline and project packet

Lesson Objective:

Students will be able to learn about different famous astronauts from different cultural backgrounds through a research project.

Instructional Delivery

Culturally Responsive Teaching strategy:

Chew- actively processing new information

Procedures:

- 1- Students will be presented with the project directions and the research template.
- 2- Students will pick which astronaut they want to research.
- 3- Students will use the links provided to find information on the astronaut that they chose.
- 4- Students will fill in the research template with the information that they found about their astronaut.

Assessment/Evaluation

Formative/Summative:

Formative: the project will be graded based on a rubric of requirements. This will be a graded project grade that will go into genesis.

Closure:

Students will be able to share their astronauts by presenting their research project to the class to teach them about their astronaut.
