	w can you tell the difference between a stratus and a stratonimbus cloud?
	A stratus cloud is small and a stratonimbus cloud is very tall. A stratonimbus cloud has a lighter color.
	A stratonimbus cloud has a lighter color. A stratonimbus cloud is darker than a stratus cloud, and causes rain.
	A stratus cloud only covers part of the sky, and a stratonimbus cloud covers the whole sky.
2. Stra	atonimbus storms usually cause rain all day long because the clouds are very wide so they spend a long time over one area.
	there is no wind in stratonimbus storms.
C.	they turn into cumulus clouds.
d.	they turn into stratus clouds.
3. Tro	pical climate zones are very wet and humid because
	the temperature is cold.
	they have many types of plants.
	the Earth travels in a circle around the sun they have more lakes and rivers.
u.	sunbeams shine directly on them, causing more water evaporation and rainfall.
Short .	<u>Answer</u>
1. Wh	ere do clouds come from?

_	
Ŋ	pe of rain cloud:
