# **MP2d-Factors & Multiples**

Content Area: Mathematics

Course(s): Math 4 Resource Room
Time Period: Marking Period 2
Length: MP2 Topic 7 7-1 to 7-5

Status: **Published** 

#### **Essential Questions**

- How can you use arrays or multiplication to find the factors of a number?
- How can you identify prime and composite numbers?
- How can you find multiples of a number?

#### **Big Ideas**

- Factors and Factor Pairs: Students are given a number and they use reasoning to find factor pairs.
- **Prime and Composite Numbers:** Students are introduced to whole numbers greater than 1 as either prime or composite.
- **Multiples:** Students determine whether a given whole number is a multiple of a given 1-digit number. They also see how a multiplication chart can help them find multiples.
- Relationships Between Factors and Multiples: Introduce the relationships between factors and multiples.

## **Enduring Understandings**

### **Operations and Algebraic Thinking**

4.OA.B.4[M] Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

| 8. Look for and express regularity in repeated reasoning |  |
