## Essential Questions

---

How can the computer help me showcase my learning?

## Big Ideas

---

Students use a word processing application to write, edit, and publish documents that demonstrate effective formatting for specific audiences, including font attributes, color, orientation, alignment, margins, list attributes, and spacing. Students graph and present data using spreadsheet applications and choose the most appropriate type of graph to represent given data.

## Cross Curricular Integration

---

Integration Area: Math

3.MD.B.3 Measurement and Data: Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. For example, draw a bar graph in which each square in the bar graph might represent 5 pets.

Activity:

Represent and interpret data. Organize and present collected data visually to communicate insights gained from different views of the data. Favorite candy bar graph.

## Diversity Integration
