## Learning Goals and Scales 2014-2015

## **Rigorous Learning Goal/Scale**

Course:	<b>Biology- Unit 2- Matter and Energy in Organisms and</b>
	Ecosystems-Ecosystems
Score 4	In addition to score 3.0 performance, the student demonstrates in-depth inferences and applications that go beyond what was taught.
Additional Success with the complex content and concepts—inferences, novel applications	Students will make an inference beyond what was explicitly taught. Students apply learned content
	Student makes no major errors or omissions regarding the score 4 content  TARGET LEARNING GOAL: The student will be able to explain how
Score 3	matter and energy move through ecosystems.
Mastery of complex	matter and energy move unough ecosystems.
content and concepts of	Explain how living systems recycle matter.
learning goal	• Explain how energy is used by a living system.
Score 2	The student will recognize or recall specific vocabulary or basic content, such as:
Success with simpler content—vocabulary,	<ul> <li>Define and apply vocabulary associated with the cycling of matter and the flow of energy in aerobic and anaerobic conditions in an ecosystem.</li> </ul>
foundational skills	The student will perform basic skills or process, such as:
	Compare and contrast the cycling of matter and the flow of energy, using mathematical models, in an ecosystem.
	Student makes no major errors or omissions regarding the score 2 content
Score 1	With help, student achieves partial success at score 2 content and/or
Partial success with help	score 3 content
Score 0	
No success even with	Even with help, no success
help
