# Alg2H Unit 03 (Chapter 4): Quadratic Equations

Content Area: Math

Course(s): Level 1 Engineering Drawing, Algebra 2 CP, Algebra 2 A, Algebra 2 H

Time Period: Marking Period 2

Length: 2 weeks
Status: Published

## **Standards**

MA.A-SSE.A.1a	Interpret parts of an expression, such as terms, factors, and coefficients.
MA.A-SSE.A.2	Use the structure of an expression to identify ways to rewrite it. For example, see $x^4 - y^4$ as $(x^2)^2 - (y^2)^2$ , thus recognizing it as a difference of squares that can be factored as $(x^2 - y^2)(x^2 + y^2)$ .
MA.F-IF.B.4	For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship.
MA.F-IF.B.6	Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.
MA.F-IF.C.7	Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.
MA.N-CN.A.1	Know there is a complex number $i$ such that $i^2$ = -1, and every complex number has the form $a$ + $bi$ with $a$ and $b$ real.
MA.A-APR.B.3	Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.
MA.F-IF.C.9	Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions).
MA.F-BF.A.1	Write a function that describes a relationship between two quantities.
MA.A-CED.A.1	Create equations and inequalities in one variable and use them to solve problems.
MA.A-CED.A.2	Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.
MA.A-CED.A.3	Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context.
MA.F-BF.B.3	Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$ , $kf(x)$ , $f(kx)$ , and $f(x + k)$ for specific values of $k$ (both positive and negative); find the value of $k$ given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology.
MA.F-BF.B.5	Use the inverse relationship between exponents and logarithms to solve problems involving logarithms and exponents.
MA.A-REI.B.4	Solve quadratic equations in one variable.
MA.A-REI.B.4b	Solve quadratic equations by inspection (e.g., for $x^2 = 49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them

as  $a \pm bi$  for real numbers a and b.

## **Unit Introduction**

# **Essential Questions**

- How are the real solutions of a quadratic equation related to the graph of the related quadratic function?
- How is any quadratic function related to the parent quadratic function y=x^2?
- What are the advantages of a quadratic function in vertex form? In standard form?

### Content

- Sec 4.1 Quadratic Functions and Transformations (pg. 194)
- Sec 4.2 Standard Form of a Quadratic Function (pg. 202)
- Sec 4.3 Modeling With Quadratic Functions (pg. 209)
- Sec 4.4 Factoring Quadratic Expressions (pg. 216)
- Sec 4.5 Quadratic Equations (pg. 226)
- Sec 4.6 Completing the Square (pg. 233)
- Sec 4.7 Quadratic Formula (pg. 240)
- Sec 4.8 Complex Numbers (pg. 248)
- Sec 4.9 Quadratic Systems (pg. 258)

#### **Skills**

- Completing the Square
- Factoring using complex conjugates
- Find zeros of a quadratic function from a graph
- Finding imaginary solutions
- Graph a quadratic function in standard form
- Graph a quadratic function in vertex form
- Identify axis of symmetry
- · Identify maximum and minimum
- Identify transformations on a quadratic function
- Identify vertex
- Operations of complex numbers
- Solve quadratic functions by factoring
- Solving a linear-quadratic system
- Solving a perfect square trinomial equation
- Solving a quadratic system
- Solving by finding square roots
- Use graphing calculators and technology where appropriate

- Use relevant vocabulary, notations, and symbols when appropriate
- Using and applying the quadratic formula
- Using the discriminant to solve a problem
- Writing in vertex form
