General Overview, Course Description or Course Philosophy

This course is designed to provide students with a continuing instrumental music education through performance. The class will perform two concerts during the year to demonstrate their learning of such music and have small group lessons to address the skills associated with each different instrument. The daily objective of the course is to foster and promote music growth through the playing of an instrument by the student, at an appropriate level of difficulty. As the band works as a team, group effort and cooperation are necessary for a successful program. Band is a skilled effort in which each student is expected to show technical and musical growth throughout the course.

OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

- Warm-up is an integral part of instrumental music because the techniques and ideas utilized in the warm up should be applied directly to the repertoire that will be performed in concert.
