Content Area: **Art**
Course(s):
Time Period: **Semester**
Length: **1 Week**
Status: **Published**

General Overview, Course Description or Course Philosophy

The computer arts course is designed to offer students the skills and understanding to navigate and create artwork in the leading industry-standard vector graphics software programs. Students will create everything from web and mobile graphics to logos, icons, book illustrations, product packaging, and billboards. They will turn shapes and colors into logos and icons. Create typography, draw freehand, and trace and recolor graphics. They will work predominantly in Adobe Illustrator which is vector-based, so their artwork stays crisp even when scaled up to stadium size. Students will have assembled a digital portfolio showcasing their skills by the end of the course.

OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

Objective: Learn the basics of sharing computer art work, including sharing files, saving as PDF, and exporting images.

Essential Questions: How do people relate to and interpret media artworks? How can the viewer "read" a work of art as text? How does knowing and using arts vocabulary help us understand and interpret works of art?

Enduring Understandings: Interpretation and appreciation of an artwork and its media require consideration of form, context and personal experience. Analysis of media artworks provides clues to their expressive intent.
