#### **General Overview, Course Description or Course Philosophy**

The computer arts course is designed to offer students the skills and understanding to navigate and create artwork in the leading industry-standard vector graphics software programs. Students will create everything from web and mobile graphics to logos, icons, book illustrations, product packaging, and billboards. They will turn shapes and colors into logos and icons. Create typography, draw freehand, and trace and recolor graphics. They will work predominantly in Adobe Illustrator which is vector-based, so their artwork stays crisp even when scaled up to stadium size. Students will have assembled a digital portfolio showcasing their skills by the end of the course.

#### **OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS**

**Objective:** Learn the basics of using the drawing tools, including how to use the Pencil and Curvature tools, how to edit paths, and more.

**Essential Questions:** How can an artist construct a media artwork that conveys purpose, meaning and artistic quality? How do media artists improve/refine their work?

**Enduring Understandings:** The forming, integration and refinement of aesthetic components, principles and processes create purpose, meaning and artistic quality in media artworks.
