Lines often define the edges of a form. Lines can be horizontal, vertical, or diagonal, straight or curved, thick or thin. They lead your eye around the composition and can communicate information through their character and direction.

Essential Question(s):

- What conditions, attitudes and behaviors support creativity and innovative thinking?
- What factors prevent or encourage people to take creative risks?
- How does collaboration expand the creative process?
- How does knowing the contexts, histories and traditions of art forms help us create works of art and design?
- Why do artists follow or break from established traditions?
- How do artists determine what resources and criteria are needed to formulate artistic investigations?

Enduring Understanding(s):

- Creativity and innovative thinking are essential life skills that can be developed.
- Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative art-making goals.

- Line is the first and the most fundamental element which is used in the creation of 2D and 3D work of art.
- Lines can be geometric or organic.
