General Overview, Course Description or Course Philosophy

New Jersey Core Curriculum Content Standard 7

The study of another language and culture enables individuals, whether functioning as citizens or workers, to communicate face-to-face and by virtual means in appropriate ways with people from diverse cultures. An education in world languages fosters a population that: communicates in more than one language with the levels of language proficiency that are required to function in a variety of occupations and careers in the contemporary workplace, exhibits attitudes, values, and skills that indicate a positive disposition and understanding of cultural differences and that enhance cross-cultural communication and values language learning as a global literacy as well as for its long-term worth in fostering personal, work-related, and/or financial success in our increasingly interconnected world.

Course Description: Latin 3

The purpose of the Latin 3 curriculum is to improve student reading comprehension and translation skills through exposure to adapted and authentic Latin texts. Through the readings, students trace the history of Rome from its legendary founding by Aeneas up to the end of the Republican period. Students also read extended narratives in Latin describing the great adventures of heroes from Greco-Roman mythology. Students analyze the stories to determine the values that were important to the Greeks and the Romans, while comparing them with those promoted by American society. The course also provides students with the opportunity to improve their command of the technical terms and vocabulary associated with the Latin AP Exam. The course concludes with brief Latin readings taken from Caesar's *Gallic Wars* and Vergil's *Aeneid*, the two texts that are the focus of the Latin AP Exam. Media aids are used to enhance the academic experience.

OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

Students will understand that:

- the heroes of Greco-Roman mythology can be superhuman in their physical and mental prowess but all too human in their emotions and desires.
- through hypotaxis or subordination written communication can become more complex and sophisticated.
