General Overview, Course Description or Course Philosophy

Social Studies 8

All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.

OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

Unit Summary:

The Preamble to the United States Constitution outlines its purposes and ideals in the following language: “We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States...”

This unit will investigate the challenges and triumphs to fulfilling our American ideals. The unit will begin with an examination of the goals highlighted in the Preamble of the Constitution. By tracing the preamble through American history, students will assess the effectiveness of our early citizens in meeting the goals of the Constitution. Students will evaluate how each American ideal has grown and expanded to be more inclusive. As we continue to struggle in fulfilling the potential of the American ideals, students will be encouraged to identify additional areas of growth toward a “more perfect union.”

Essential Question(s):

- How have economic, political, and cultural decisions promoted or prevented the growth of personal freedom, individual responsibility, equality, and the respect for human dignity?

Enduring Understanding(s):

- Political and civil institutions impact all aspects of people's lives.
- The United States system of government is designed to realize the ideals of liberty, democracy, limited government, equality under the law and of opportunity, justice, and property rights.
- Fundamental rights are derived from the inherent worth of each individual and include civil, political, social, economic, and cultural rights.
- Social and political systems have protected and denied human rights (to varying degrees) throughout time.
- Historical contexts and events shaped and continue to shape people's perspectives.
- In a democratic government, there are multiple processes by which individuals can influence the creation of rules, laws, and public policy.

STUDENT LEARNING TARGETS

Declarative Knowledge

Students will understand that:

- One of the great successes of the American experience is demonstrating to the world that citizens could establish a government based on a social contract with the “consent of the governed”. A founding generation drafted a Constitution that joined political ideas and practical experience, making real what had previously only been a theory.
- The Constitution addressed many of the deficiencies of the Articles of Confederation.
- The right to vote, initially granted to a limited segment of the population, has gradually been extended to different groups enhancing the concept of “the consent of the governed”.
- Ensuring the right to vote is an essential component of a successful democracy.
- The desire for “fairness” or “justice” is a primary reason why people are willing to create a government. These concepts are difficult to precisely define. The Constitution and state constitutions establish a court system to help decide questions of justice.
- The right to “due process” is considered one of the most fundamental guarantees of individual right
- Procedural Due Process means that the government must follow rules and procedures that are reasonable, fair, and not arbitrary.
- Substantive Due Process means that the government cannot make or interpret laws in a way that violates fundamental rights.
- The Fifth Amendment established the concept of “due process” in the Constitution regarding the federal government.
- The Fourteenth Amendment extended the concept of “equal protection under the law” to the states.
- Domestic tranquility refers to the expectation by citizens that government will ensure an orderly society based on due process and an inviolate/minimum sphere of personal liberty.
- Democracy places a high value on the right to privacy, which is the basis for many of the more specific protections enshrined in the Bill of Rights.

- The right to privacy and other rights have sometimes been restricted during times of war as the need to ensure national security conflicts with more expansive individual rights enjoyed during times of peace. It is the role of the courts to help determine the appropriate constitutional balance between individual rights and national security and to review acts of the legislative and executive branches.
- Habeas corpus is a fundamental right that prevents arbitrary abuse of authority by the government and indefinite detentions of political opponents.
- The peaceful transfer of power is a critical element of democracy, requiring both constitutional procedures and the commitment by citizens to uphold a free society and a republican form of government.
- The use of force by the government must be within constitutional constraints in a democratic society. A cornerstone of American democracy has been a professional, non-political military that takes an oath to support the Constitution.
- The American system of limited government is designed to promote a specific definition of liberty. This definition differs from that used by other nations with different forms of government.
- The American system of government is based on the concept of social contract theory and the idea that individuals agree to place some limits on their absolute liberty in order to actually enjoy the greatest possible amount of liberty. What these limits should be is an important part of Constitutional law and public discourse.
- Democracies must also balance individual liberty and “the common good”. Debates about how to best achieve this balance is an important element of politics and public policy.
