## 03: Gravity & Satellite Motion

Content Area: Special Education

Course(s):

Time Period: Full Year
Length: 4 weeks
Status: Published

### **General Overview, Course Description or Course Philosophy**

Physical Science establishes a basic approach to the fundamentals of chemistry and physics. The following concepts will be explored: atomic structure, chemical bonding, chemical reactions, the periodic table, kinetic theory, and kinematics. The use of technology to gather and analyze data will be incorporated. This course is concept-oriented with a focus on Chemistry and Physics in the real world. Laboratory work and special projects will facilitate active learning and accommodate different learning styles.

### **OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS**

Students will understand that:

- Gravity is a fundamental attractive force between masses.
- Gravity causes masses to attract to the center of mass.
- Gravity is proportional to the product of the masses and inversely proportional to the square of the distance between them.

#### **CONTENT AREA STANDARDS**

SCI.HS-PS2-4 Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to

describe and predict the gravitational and electrostatic forces between objects.

SCI.HS-ESS1-4 Use mathematical or computational representations to predict the motion of orbiting

objects in the solar system.

# RELATED STANDARDS (Technology, 21st Century Life & Careers, ELA Companion Standards are Required)

CRP 2 Apply appropriate academic and technical skills.

CRP 4 Communicate clearly and effectively and with reason.

CRP 5 Consider the environmental, social and economic impacts of decisions.

CRP 6 Demonstrate creativity and innovation.

CRP 8 Utilize critical thinking to make sense of problems and persevere in solving them.

CRP 11 Use technology to enhance productivity.

Student Learning Targets
Refer to Declarative and Procedural Knowledge.
Declarative Knowledge
Students will understand:
Dve coduvel Knowledge
Procedural Knowledge Students will be able to:
EVIDENCE OF LEARNING
Refer to the 'Formative Assessments' and 'Summative Assessments' sections.
Formative Assessments
Observation, do now, homework
Summative Assessments
Benchmarks – departmental benchmark given at the end of MP1, MP2, and MP3
Alternative Assessments
<ul> <li>Lab inquiries and investigations</li> </ul>
• Lab Practicals
<ul> <li>Exploratory activities based on phenomenon</li> </ul>

• Gallery walks of student work

• Creative Extension Projects

- Build a model of a proposed solution
- Let students design their own flashcards to test each other
- Keynote presentations made by students on a topic
- Portfolio

### **RESOURCES (Instructional, Supplemental, Intervention Materials)**

physicsclassroom.com Vernier.com/experiments Khan Academy, Crash Course Physics, and Bozeman Science

### **INTERDISCIPLINARY CONNECTIONS**

Algebra, English, Geometry

### **ACCOMMODATIONS & MODIFICATIONS FOR SUBGROUPS**

See link to Accommodations & Modifications document in course folder.
